

Software FAQ Lists for TruE 3

TruE 3 Configure

Listed versions: 3.0

cc001 Warning. Some TruE 3 apps still appear to be running. Do you really want to reset all modules?

This message is displayed if you select Reset All Apps in the Utilities tab while other TruEmbroidery™ 3 Software apps are running. Click Cancel, or use Quit Open TruE 3 Apps to close all open apps.

cc002 Application could not be shut down. TruE 3 XX could not be quit. Please shut this app down manually.

This message is displayed if you select Quit Open TruE 3 Apps in Reset All Apps when, for instance, a dialog is open or you have unsaved changes in a TruEmbroidery™ 3 Software app. Click OK, and then shut the app down manually.

cc003 The value '*mm' needs to be in the range 1 to 3mm. Please provide a valid value.

This message appears if the tolerance value entered in the box on the Export tab is below 1mm or above 3mm, or is not a number. Enter a number within the valid range.

cc004 The value '*mm' needs to be in the range 5 to 200mm. Please provide a valid value.

This message appears if the value entered in the Real Size box on the Appearance tab is below 5mm or above 200mm, or is not a number. Enter a number within the valid range.

cc005 Restoring your settings will overwrite the current settings.

This message is displayed when you click Restore My Settings in the Utilities tab. Click OK, or click Cancel to keep your current settings.

cc006 Reset All Apps: To reset all applications correctly, you must ensure that no TruE 3 apps are open.

This message is displayed if you select Reset All Apps in the Utilities tab while other TruEmbroidery™ 3 Software apps are running. Click Cancel, or use Quit. Open TruE 3 Apps to close all open apps.

CC007 Application could not be shut down. TruE 3 XX could not be quit. Please shut this app down manually.

This message is displayed if you select Quit Open TruE 3 Apps in Reset All Apps when, for instance, a dialog is open or you have unsaved changes in a TruEmbroidery™ 3 Software app. Click OK, and then shut the app down manually.

EC003 Can I have the TruE™ 3 Machine app automatically start when I turn on my computer?

Yes, you can by using the following instructions:

1. Click on **System Preferences** from your **Dock** - the icon that looks like a cog.
2. In the **System**, click on the **Users & Groups** icon.
3. Ensure that your user account (listed near the top left section of that window, under **Current User**) is selected.
4. Click on the **Login Items** tab - on the right hand pane of that window.
5. Click on the **+** icon on the right hand pane of that window. An Open dialog will appear.
6. On the left hand pane - under the **Favorites** section; click on the **Applications** entry.
7. In the right hand pane, scroll down the list of apps until you come to the **TruE™ 3 Machine** entry.
8. Select the **TruE™ 3 Machine** entry and click on the **Add** button.
9. You will now see **TruE™ 3 Machine** in the list of items that will automatically start when you log in.
10. Close **System Preferences/Users & Groups**.

When you next log into your computer; the **TruE™ 3 Machine** app will automatically run.

EC004 Can I connect more than one embroidery machine to my computer with TruE™ 3 Machine?

No, you are not able to connect two embroidery machines at the same time, and to send a design to the first embroidery machine and then to the second embroidery machine.

If you want to send an embroidery to two machines, do as follows

1. Send the design to the first machine.
2. Disconnect the USB connection between your **Mac** and that embroidery machine.
3. Connect a USB cable between your second embroidery machine and your **Mac**.
4. Send a design to that second embroidery machine.

EC005 I cannot send a design to my embroidery machine.

First, confirm that the TruE™ 3 Machine app is running. TruE™ 3 Machine appears as a machine icon in the menu bar.

If TruE™ Machine is not running, start it.

- Click the TruE™ 3 Machine icon in the Launchpad , or double-click the TruE™ 3 Machine icon in the Finder

Second, confirm that the TruE™ 3 Machine app is communicating with your embroidery machine.

- Click the machine icon in the menu bar and check that your embroidery machine is listed in the menu. If it is not, check the USB connection, then choose Quit and start TruE™ 3 Machine again.

Note: If the USB connection between your embroidery machine and computer is temporarily interrupted, you may need to restart TruE™ 3 Machine.

EC006 I have sent a design to my embroidery machine, but nothing is happening.

You can only send a design directly to your embroidery machine if the following folder exists:

/[Home]/TruEmbroidery/TempSend.

If this folder does not exist, do as follows:

1. Open a Finder window.
2. Choose **Go > Home**.
3. Click the **TruEmbroidery** folder to open it.
4. **Control-click** an empty area of the screen and choose **New Folder** from the context menu.
5. Name the new folder **TempSend**.
6. Send the design again.

Now try to send the design again.

EC008 I exported my embroidery to my USB stick, but I cannot browse to it on my embroidery machine.

Your embroidery machine may not be able to read USB sticks with a large capacity. Check the manual for your embroidery machine for information on limitations on the size of USB stick memory.

EC009 I exported my embroidery to my USB stick, but I cannot find it when I browse the stick on my embroidery machine.

You may need to place the embroidery within a particular folder on your USB stick. For example, on the Janome MC350E the embroidery files must be placed in the EMB5 folder, while for the MC11000 and MC12000 they must be placed in the Embf folder.

GA002 Error: "Embroidery too large for output file format"

Certain formats are limited to the size of hoop used on their specific embroidery machine, for example .sew. If you attempt to save a file in this format that is bigger than the largest available hoop size this message would appear.

GE001 I cannot open Melco (.exp) files into the TruEmbroidery 3 software.

The Melco format (.exp) extension is also used by default in the Mac operating system.

Therefore, you would not be able to open those files via the Open dialog.

In order to use Melco files; use Insert/View to use those designs in your TruEmbroidery 3 software.

GE002 Some of the items in a menu are dimmed.

Certain items (for example Undo in the Edit menu) are only available once an embroidery design is shown on the screen.

GE003 I have changed grid color and spacing and now I wish to return to the original settings."

Use TruE™ 3 Configure to change the grid color. Click the Color block and the Colors window appears to allow you to choose a color. The color set by default for your TruEmbroidery™ Software is 127, 127, 127 (RGB). You can use the RGB Sliders in the Colors Sliders tab to return to this color.

Use Preferences to change the grid spacing. Set the Grid Size to 10mm.

GE004 I have changed the screen background color and now I wish to return to the original light blue.

Use TruE™ 3 Configure to change the grid color. Click the Color block and the Colors window appears to allow you to choose a color. The color set by default for your TruEmbroidery™ Software is 211, 233, 255 (RGB). You can use the RGB Sliders in the Colors Sliders tab to return to this color.

GE005 I can't see the toolbar or some of the icons.

Use Reset All Apps in TruE™ 3 Configure to return the toolbar and windows in the app to their default settings.

To return the icons in the toolbar to their default settings, choose View > Customize Toolbar, and drag the default icon set into the toolbar.

To use Reset All Apps:

1. Ensure your designs are saved in any TruEmbroidery™ 3 Software apps that are open.
2. Click the TruE™ 3 Configure icon in the Launchpad, or double-click the TruE™ 3 Configure icon in the Finder.
3. Click the Utilities tab.
4. Click Reset All Apps.
5. Click the Quit Open TruE 3 Apps button to close all open apps.
6. Click the Reset All Apps button.

Note: If some TruE 3 apps are still open, a message will appear, saying that some apps appear to be running. Click OK to close all running TruE 3 apps, or click Cancel.

The toolbar and windows in your app will have been restored to their original state.

Note: If preferred, to check the toolbar choose View, then choose Show Toolbar if the toolbar has been hidden, or choose Customize Toolbar to reset the toolbar if icons have been added to or removed

GE007 When I try to use the numbers box to select a thread number, the wrong thread shade is selected.

The find thread feature in Color Selection allows you to enter partial thread numbers. The first thread in the list matching the number is found, with priority given to an exact match. The existing thread number is also listed. If you are attempting to find a thread with only part of the number, the first thread matched may not be the desired thread. To ensure you select the correct thread, enter the thread number as it appears in the list. Some thread ranges have prefix characters on the thread number. These must also be entered to obtain an exact match.

GE008 A thread in an embroidery from a friend had a different name or number when I first opened it.

The thread name or number is changed when the thread is opened if the Thread Range of the selected color is not found in your thread database. This could happen if the design you are attempting to edit was supplied by someone with a later version of the thread database. The color will be replaced with the nearest match in the Import Thread Range you have set in TruE™ 3 Configure. You can alter it to any other color if desired. To check for the latest updates for the TruEmbroidery™ 3 Software, use Smart Update in TruE™ 3 Configure.

GE010 No dongle attached. Cannot open or use application (7).

This message will appear when trying to start an app if the TruEmbroidery™ 3 Software cannot detect the dongle (data protection device). Ensure the dongle is plugged into a free USB port of your computer

GE011 No dongle attached. Cannot open or use application (33).

This message may appear if you try to use TruE™ 3 Create shortly after starting or logging into your computer, before the system is fully ready. Wait for a few seconds and try again.

GE026 Not enough memory available to perform function.

This message will appear when system resources are low. Close other apps and try again. If this does not work, try restarting your computer.

GE031 Not enough memory available to perform function.

This message may appear if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE032 Cannot open stitch file.

This message may appear if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE039 Information About Colors in TruEmbroidery™ 3 Software Files

The TruEmbroidery™ 3 Software will display threads in a file in the same way on any computer where it is installed. That is, the colors used will be the same even if they are reproduced slightly differently on different monitors. You can print a worksheet to see the colors and color names used in a particular design. This is true, even if you do not have all the threads in a design defined in the database on your computer. This is because a TruEmbroidery™ 3 Software design has complete information for each of the threads it uses.

Each thread used in a design will fall into one of the following categories:

- A thread from the Thread Database.
- A thread from the Thread Database that is not on your own Thread Database because your database is out of date.
- A custom thread defined in the file that does not appear in your Threads database.

The availability of threads in the Thread Database will only affect parts of the TruEmbroidery™ 3 Software where you can change colors, as follows:

- Editing apps: TruE™ 3 Studio and TruE™ 3 Modify
- Design apps: TruE™ 3 Create
- Adding/Editing Thread: TruE™ 3 Thread Cache
- Generating fonts: TruE™ 3 QuickFont

Below are some situations you may encounter according to the availability of thread definitions, as categorized above.

GE040 I have a design from another user that uses threads from the Thread Database that I do not have.

Use Smart Update to find and download the latest thread database, which you can then install.

GE045 Exporting SHV designs to my USB Embroidery Stick seems slow.

The process of exporting SHV designs to a USB Embroidery stick may take up to a few minutes.

When the 'Exporting to USB Stick' progress bar disappears; then the designs have written to the USB Embroidery Stick.

Be sure to go to **Finder** and *Eject* your USB Stick before removing it from the computer and inserting it into your Designer 1 USB machine.

GE046 When I export SHV files to my USB Embroidery Stick, it does not appear to have written the designs to the USB Stick.

It may be that your USB Embroidery Stick is running very low on space.

It is advisable to format your USB Embroidery Stick to ensure that it has enough space for your SHV designs to be written.

*The following formatting process will delete **ALL** files/folders from your **USB Embroidery Stick**. If you have any files/folders that you wanted to keep, then backup them up before proceeding with the following procedure.*

1. Eject and then remove all USB Sticks/Hard Disk from your Mac®.
2. Insert your **USB Embroidery Stick** that you would like to format.
3. Open **Finder**.
4. Click on the **Go** menu.
5. Click on the **Home** option.
6. Browse to the **.../TruEmbroidery3/Samples/Finder/Stitch/Animals**
7. **Control+click** on any .vp3 file shown. A context menu will appear.
8. Move your mouse to the **Services** sub-menu
9. Click on the **TruE 3 Convert** option. A **TruE 3 Convert** box should appear.
10. Click on the ... button in the **Output File Type** section.
11. Select **Husqvarna Viking Designer 1 (.shv)** from the list.
12. Click on the **USB Stick** icon in the **Select Device** section
13. Click on the **Format** button in that section. A warning will appear.
14. After you have read and accepted the warning, click **Yes** to start the Formatting process.
15. The formatting process should take less than a minute.
16. When it is complete, try to export your SHV designs again to the USB Embroidery Stick.

GE047 How do I change the measurement in the TruE 3 software?

The measurements are taken from the settings on the Appearance tab in the **TruE 3 Configure**.

To change those settings, do the following:

1. Go to the **Launchpad**.
2. Open **TruE 3 Configure**..
3. Click on the **Appearance** tab.
4. From the **Show Measurements In:** section, either choose **Millimeters (mm)** or **Inches (")**.

GE048 I have a Husqvarna Viking Designer I machine; how do I create a SHV design?

You would need to choose **Husqvarna Viking Designer I** from the **Export** dialog:

1. Click on the **File** menu
2. Choose **Export**.
3. Select **Husqvarna Viking Designer I (.shv)** from the drop-down list.
4. Depending on which device (**floppy disk** or **USB Embroidery Stick**) you are write to, you will click on the appropriate icon for that device.
5. **[Optional] to backup the items already on your floppy disk/USB Embroidery Stick; click on the Read Stick or Disk button and then choose the location to save your backup to.**
6. Click on the **Next** button to start writing to that device.

n.b. The instructions above are only applicable to **TruE 3 Elite** or **TruE 3 Elements** owners with activated dongles.

GE049 I cannot see all my **TruE 3** icons in **Launchpad**.

Launchpad shows the icons for all your installed software on your **Mac®** computer.

Depending on how many apps you have installed on your **Mac®**; the icons may span more than one page in **Launchpad** .

When there is more than one page of icons available in **Launchpad** , there will be a number of 'dots' – representing all the available **Launchpad** pages. The dot for the current page will be highlighted, click on one of the other dots to navigate between pages.

HD001 How do I find the latest dongle drivers?

The latest dongle drivers (v7.40) can be found by opening **TruE3 Configure** and then clicking on the **Smart Update** button.

The dongle drivers allow compatibility with the latest Mac® OS X El Capitan operating system.

IN001 This package will run a program to determine if the software can be Installed.

This message appears when installing the Samples or Bonus Designs. Click Continue to proceed with the installation if the dongle has already been activated. Otherwise, activate your dongle, and then install the Samples or Bonus Designs.

IN002 Activated dongle not found: Your dongle must be Registered and Activated for TruEmbroidery™ 3 Software before installing the samples.

This message appears if you try to install the Samples or Bonus Designs before activating your dongle. Install TruEmbroidery™ 3 Software and activate your dongle before installing the Samples or Bonus Designs.

IN021 Where are my samples/backgrounds/documents/bonus designs?

When installing any of the TruEmbroidery™ 3 Software samples/backgrounds/documents/bonus designs the files should be installed in subfolders of the folder `/Users/Home/TruEmbroidery3/` (where *Home* means the account of the user you are logged in as), however occasionally this may not be the case. This will result in your samples/backgrounds/documents/bonus designs being installed into the root of your hard disk, for example Macintosh HD.

If this occurs, you may either load the samples from their current location, or move/copy the folder(s) to the correct location.

Please note that by default the Mac® will replace the content inside the folder, therefore it is recommended to make a copy of your files before replacing.

IN023 Since upgrading to MacOS Catalina, my work area does not appear when I open some TruE3 modules

When opening **TruE3 Studio** or **TruE3 Create**, the module opens (and shows the menus), but the work area does not appear.

[These instructions are not required on any Mac operating system version earlier than MacOS Catalina (10.15)]

You will need to:

- Download the [MacOS Catalina - TruE3 Patch](#)
- Follow the instructions in the following video to resolve the issue - [MacOS Catalina TruE3 patch video](#)

If your installed TruE3 Software is not at version 3.2; you can download the latest [TruE3 Software 3.2](#) from here and then install it.

Depending on the setup of your computer/device, the video may view in your browser, or download the file. If the file is downloaded, you will be required to find and open the downloaded video file.

IN024 "This package is incompatible with this version of macOS."

You may receive this error message when trying to install the older dongle drivers for TruE3 onto macOS Catalina.

If you receive this message, you should download and install the latest [TruE3 Dongle Drivers](#)

RE001 How do I change my personal information for my software registration?

Simply click the Register button in TruE™ 3 Configure and repeat the registration process. This does not change the registration status of software you have already registered, but it does allow you to change your personal information and/or dealer information.

Ensure your dongle is connected to your computer before you start, so that your current registration details can be easily retrieved.

If your dongle is not connected, you will need to enter your e-mail address and password to find your registration details.

TC127 Clicking on the Register, Activate Dongle or Smart Update buttons have no effect

This may occur on an existing installation of the TruE 3 Embroidery System as a result of upgrading to the latest **Mac OS Update**

To resolve this issue; do the following steps:

1. Go to <http://www.truembroidery.com>
2. Click on the **Downloads** link at the top of the page.
3. Click on the **True 3 Download Portal** button.
4. Enter your registered **E-mail Address**.
5. Enter your **Password**. Click **Next**.
6. Click **Next** again.
7. In the **TruEmbroidery 3 Software** section, download the latest **TruEmbroidery3Software32.pkg** file.
8. Close down all TruEmbroidery 3 System Apps.
9. Install the **TruEmbroidery3Software32.pkg** file that you just downloaded.
10. Open **TruE 3 Configure** and confirm that clicking on the **Register**, **Activate Dongle** and **Smart Update** buttons now open up a window in the background.

TC129 Delete My Fill: Are you sure you want to delete the selected pattern? This action cannot be undone.

This message appears when you delete a My Fill pattern from the Manage My Fills dialog. Click Yes or No, as desired.

TruE 3 Create

Listed versions: 3.0

cc001 Warning. Some TruE 3 apps still appear to be running. Do you really want to reset all modules?

This message is displayed if you select Reset All Apps in the Utilities tab while other TruEmbroidery™ 3 Software apps are running. Click Cancel, or use Quit Open TruE 3 Apps to close all open apps.

EC003 Can I have the TruE™ 3 Machine app automatically start when I turn on my computer?

Yes, you can by using the following instructions:

1. Click on **System Preferences** from your **Dock** - the icon that looks like a cog.
2. In the **System**, click on the **Users & Groups** icon.
3. Ensure that your user account (listed near the top left section of that window, under **Current User**) is selected.
4. Click on the **Login Items** tab - on the right hand pane of that window.
5. Click on the **+** icon on the right hand pane of that window. An Open dialog will appear.
6. On the left hand pane - under the **Favorites** section; click on the **Applications** entry.
7. In the right hand pane, scroll down the list of apps until you come to the **TruE™ 3 Machine** entry.
8. Select the **TruE™ 3 Machine** entry and click on the **Add** button.
9. You will now see **TruE™ 3 Machine** in the list of items that will automatically start when you log in.
10. Close **System Preferences/Users & Groups**.

When you next log into your computer; the **TruE™ 3 Machine** app will automatically run.

EC004 Can I connect more than one embroidery machine to my computer with TruE™ 3 Machine?

No, you are not able to connect two embroidery machines at the same time, and to send a design to the first embroidery machine and then to the second embroidery machine.

If you want to send an embroidery to two machines, do as follows

1. Send the design to the first machine.
2. Disconnect the USB connection between your **Mac** and that embroidery machine.
3. Connect a USB cable between your second embroidery machine and your **Mac**.
4. Send a design to that second embroidery machine.

EC005 I cannot send a design to my embroidery machine.

First, confirm that the TruE™ 3 Machine app is running. TruE™ 3 Machine appears as a machine icon in the menu bar.

If TruE™ Machine is not running, start it.

- Click the TruE™ 3 Machine icon in the Launchpad , or double-click the TruE™ 3 Machine icon in the Finder

Second, confirm that the TruE™ 3 Machine app is communicating with your embroidery machine.

- Click the machine icon in the menu bar and check that your embroidery machine is listed in the menu. If it is not, check the USB connection, then choose Quit and start TruE™ 3 Machine again.

Note: If the USB connection between your embroidery machine and computer is temporarily interrupted, you may need to restart TruE™ 3 Machine.

EC006 I have sent a design to my embroidery machine, but nothing is happening.

You can only send a design directly to your embroidery machine if the following folder exists:

/[Home]/TruEmbroidery/TempSend.

If this folder does not exist, do as follows:

1. Open a Finder window.
2. Choose **Go > Home**.
3. Click the **TruEmbroidery** folder to open it.
4. **Control-click** an empty area of the screen and choose **New Folder** from the context menu.
5. Name the new folder **TempSend**.
6. Send the design again.

Now try to send the design again.

EC008 I exported my embroidery to my USB stick, but I cannot browse to it on my embroidery machine.

Your embroidery machine may not be able to read USB sticks with a large capacity. Check the manual for your embroidery machine for information on limitations on the size of USB stick memory.

EC009 I exported my embroidery to my USB stick, but I cannot find it when I browse the stick on my embroidery machine.

You may need to place the embroidery within a particular folder on your USB stick. For example, on the Janome MC350E the embroidery files must be placed in the EMB5 folder, while for the MC11000 and MC12000 they must be placed in the Embf folder.

GA002 Error: "Embroidery too large for output file format"

Certain formats are limited to the size of hoop used on their specific embroidery machine, for example .sew. If you attempt to save a file in this format that is bigger than the largest available hoop size this message would appear.

GA003 I have saved my embroidery as Tajima format, but it now has more colors

If your original embroidery had a stop command in it then this would be replaced by a color change, thus adding a color for every stop you have in your embroidery. As the Tajima file format does not have a stop command in its format, it requires the machine operator to manually enter stops into the machine. If you save or distribute files in Tajima format, then you must also specify all colors and stops and where they occur in the embroidery.

GA004 I have saved an embroidery in .sew format, and two files have been created

Janome software cannot load embroideries with more than 12 colors. If a file to be exported in .sew format has more than 12 color changes, it will automatically be split into multiple files, with the last character of the filename "1", "2", and so on.

GE001 I cannot open Melco (.exp) files into the TruEmbroidery 3 software.

The Melco format (.exp) extension is also used by default in the Mac operating system.

Therefore, you would not be able to open those files via the Open dialog.

In order to use Melco files; use Insert/View to use those designs in your TruEmbroidery 3 software.

GE002 Some of the items in a menu are dimmed.

Certain items (for example Undo in the Edit menu) are only available once an embroidery design is shown on the screen.

GE003 I have changed grid color and spacing and now I wish to return to the original settings."

Use TruE™ 3 Configure to change the grid color. Click the Color block and the Colors window appears to allow you to choose a color. The color set by default for your TruEmbroidery™ Software is 127, 127, 127 (RGB). You can use the RGB Sliders in the Colors Sliders tab to return to this color.

Use Preferences to change the grid spacing. Set the Grid Size to 10mm.

GE004 I have changed the screen background color and now I wish to return to the original light blue.

Use TruE™ 3 Configure to change the grid color. Click the Color block and the Colors window appears to allow you to choose a color. The color set by default for your TruEmbroidery™ Software is 211, 233, 255 (RGB). You can use the RGB Sliders in the Colors Sliders tab to return to this color.

GE005 I can't see the toolbar or some of the icons.

Use Reset All Apps in TruE™ 3 Configure to return the toolbar and windows in the app to their default settings.

To return the icons in the toolbar to their default settings, choose View > Customize Toolbar, and drag the default icon set into the toolbar.

To use Reset All Apps:

1. Ensure your designs are saved in any TruEmbroidery™ 3 Software apps that are open.
2. Click the TruE™ 3 Configure icon in the Launchpad, or double-click the TruE™ 3 Configure icon in the Finder.
3. Click the Utilities tab.
4. Click Reset All Apps.
5. Click the Quit Open TruE 3 Apps button to close all open apps.
6. Click the Reset All Apps button.

Note: If some TruE 3 apps are still open, a message will appear, saying that some apps appear to be running. Click OK to close all running TruE 3 apps, or click Cancel.

The toolbar and windows in your app will have been restored to their original state.

Note: If preferred, to check the toolbar choose View, then choose Show Toolbar if the toolbar has been hidden, or choose Customize Toolbar to reset the toolbar if icons have been added to or removed

GE007 When I try to use the numbers box to select a thread number, the wrong thread shade is selected.

The find thread feature in Color Selection allows you to enter partial thread numbers. The first thread in the list matching the number is found, with priority given to an exact match. The existing thread number is also listed. If you are attempting to find a thread with only part of the number, the first thread matched may not be the desired thread. To ensure you select the correct thread, enter the thread number as it appears in the list. Some thread ranges have prefix characters on the thread number. These must also be entered to obtain an exact match.

GE008 A thread in an embroidery from a friend had a different name or number when I first opened it.

The thread name or number is changed when the thread is opened if the Thread Range of the selected color is not found in your thread database. This could happen if the design you are attempting to edit was supplied by someone with a later version of the thread database. The color will be replaced with the nearest match in the Import Thread Range you have set in TruE™ 3 Configure. You can alter it to any other color if desired. To check for the latest updates for the TruEmbroidery™ 3 Software, use Smart Update in TruE™ 3 Configure.

GE009 When I open a picture the name is displayed, but I cannot see the picture and Continue is dimmed.

This can happen if the desired picture is corrupt. For example, it might have an extension such as .bmp or .jpg, yet not be a proper picture file.

GE010 No dongle attached. Cannot open or use application (7).

This message will appear when trying to start an app if the TruEmbroidery™ 3 Software cannot detect the dongle (data protection device). Ensure the dongle is plugged into a free USB port of your computer

GE011 No dongle attached. Cannot open or use application (33).

This message may appear if you try to use TruE™ 3 Create shortly after starting or logging into your computer, before the system is fully ready. Wait for a few seconds and try again.

GE012 The file XX is locked. If you want to make changes to this document, click Unlock. To keep the file unchanged and work with a copy, click Duplicate.

This message appears when trying to edit an embroidery design outline which is locked, or is on a read-only medium such as a CD-R. Unlock the embroidery design outline before editing, or duplicate it and then edit it, if it is on a read-only medium.

GE013 The file XX is on a read-only volume and cannot be unlocked. You can duplicate this document and edit the duplicate.

This message appears when trying to unlock an embroidery design outline which is on a read-only medium such as a CD-R. Duplicate it, then edit and save it.

GE014 The file doesn't exist.

This message appears if the desired design is not where the app expects it to be, for example if a design was saved to a network drive, then deleted or renamed.

The message would appear if you tried to load the design from the Open Recent list on the File menu.

GE015 Unrecognized file format.

This message appears if the design you are attempting to load is corrupt. For example, it might have the extension .edo, yet not be a proper design outline file.

GE016 Unrecognized file extension.

This message may appear if the design you are attempting to load is corrupt. For example, it might have the extension .edo, yet not be a proper design outline file.

GE017 Background Image Warning. This will remove your existing image, continue?

This message appears if you try to load a background image when an image has already been loaded. Click OK to load a new image, or Cancel to use your existing image.

GE018 Background Image Error. Could not open the background image.

This message appears if you try to load a background image and the picture is corrupt. For example, it might have an extension such as .bmp or .jpg, yet not be a proper picture file.

GE019 The document XX could not be saved as XX. The volume is read only. Try saving the file to another volume.

This message appears if, for instance, you try to save an embroidery design to a CD-R. A CD-R is read only, therefore you will not be able to save the embroidery design. Save the embroidery design to another medium .

GE020 The document XX could not be autosaved. The volume is read only. Try saving the file to another volume. You can also duplicate the document or discard your changes to close it.

This message appears if, for instance, you have loaded an embroidery design from a CD-R and then attempt to save the embroidery design back to the CD. A CD-R is read only, therefore you will not be able to save the embroidery design. Save the embroidery design to another medium .

GE021 The file already exists. Do you want to replace it?

This message appears if an embroidery you are trying to Save has a name that has already been used. Replace the existing embroidery, or choose a new name before saving.

GE022 Embroidery is too large or will not fit in hoop.

This message appears if an embroidery you are trying to Export is outside the selected hoop or larger than will fit in it. For example, with the 100mm x 100mm hoop selected, an embroidery smaller than 100mm x 100mm might be placed partially outside the work area when you choose Export. This message would then appear. Move the embroidery completely within the four blue corners of the work area and try again. Alternatively, change the size of the hoop.

GE023 The file already exists. Do you want to replace it?

This message appears if an embroidery you are trying to Export has a name that has already been used. Replace the existing embroidery, or choose a new name before exporting.

GE024 ExportDesign too large for export format. Exporting XX file failed.

Certain formats are limited to the number of stitches they can save or the size of hoop used on their specific embroidery machine, for example the .sew or Pfaff (.pcs) file format. If you attempt to save a file in this format that is bigger than the largest available hoop size, or has more stitches than are allowed, this message will appear.

GE025 Print. Embroidery is too large or will not fit in hoop.

This message appears if the embroidery on screen is partially outside the selected hoop. Move the embroidery completely within the four blue corners of the work area and try again, or change the hoop size

GE026 Not enough memory available to perform function.

This message will appear when system resources are low. Close other apps and try again. If this does not work, try restarting your computer.

GE027 Not For Sale. This is a Dealer version of the TruEmbroidery™ 3 Software and not for retail sale. If you are not a certified registered TruEmbroidery™ 3 Software dealer you are not entitled to use this software. Please contact your local dealer for further information.

This message means that the app is a dealer only version for demonstration and training purposes, and is not available for retail sale. Please contact software support for further information.

GE028 Could not understand the string XX.

This message appears if the value entered in a number box is outside the valid range, or is not a number.

GE029 The file doesn't exist.

This message appears if the desired embroidery is not where the app expects it to be, for example if an embroidery was saved to a network drive, then deleted or renamed. The message would appear if you tried to load the embroidery from the Open Recent list on the File menu.

GE030 Unrecognized file format.

This message appears if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE031 Not enough memory available to perform function.

This message may appear if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE032 Cannot open stitch file.

This message may appear if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE033 Unrecognized file extension.

This message may appear if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE034 Stitch file is corrupt.

The embroidery is corrupt and cannot be loaded. Refer to source of this file for a solution.

GE035 Stitch file XY coordinates incorrect.

The embroidery is corrupt and cannot be loaded. Refer to source of this file for a solution.

GE036 The document "xx" could not be opened.

This message appears if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE037 The file "xx" is locked. If you want to make changes to this document, click **Unlock**. To keep the file unchanged and work with a copy, click **Duplicate**

This message appears when trying to edit an embroidery which is locked, or is on a read-only medium such as a CD-R. Unlock the embroidery before editing, or duplicate it, and then edit it, if it is on a read-only medium

GE038 The file "xx" is on a read-only volume and cannot be unlocked. You can duplicate this document and edit the duplicate.

This message appears when trying to unlock an embroidery which is on a readonly medium such as a CD-R. Duplicate it, then edit and save it.

GE039 Information About Colors in TruEmbroidery™ 3 Software Files

The TruEmbroidery™ 3 Software will display threads in a file in the same way on any computer where it is installed. That is, the colors used will be the same even if they are reproduced slightly differently on different monitors. You can print a worksheet to see the colors and color names used in a particular design. This is true, even if you do not have all the threads in a design defined in the database on your computer. This is because a TruEmbroidery™ 3 Software design has complete information for each of the threads it uses.

Each thread used in a design will fall into one of the following categories:

- A thread from the Thread Database.
- A thread from the Thread Database that is not on your own Thread Database because your database is out of date.
- A custom thread defined in the file that does not appear in your Threads database.

The availability of threads in the Thread Database will only affect parts of the TruEmbroidery™ 3 Software where you can change colors, as follows:

- Editing apps: TruE™ 3 Studio and TruE™ 3 Modify
- Design apps: TruE™ 3 Create
- Adding/Editing Thread: TruE™ 3 Thread Cache
- Generating fonts: TruE™ 3 QuickFont

Below are some situations you may encounter according to the availability of thread definitions, as categorized above.

GE040 I have a design from another user that uses threads from the Thread Database that I do not have.

Use Smart Update to find and download the latest thread database, which you can then install.

GE042 Do you want to remove all points from your demo? This cannot be undone.

This message appears if you use Reset My Demo in Life View. Click Yes to continue, or No to keep your existing My Demo.

GE043 How do I backup a My Demo animation?

The **My Demo** animated preview is stored in the **AnimationPath.txt** file in the folder **/User]/Library/ApplicationSupport/VSMSSoftware/TruE3/System**. This location may not be visible on your Mac®, but you can find it using the following steps.

To Backup a My Demo Animation

1. Open the **Finder** window.
2. Open the **Go** menu.
3. Hold down the **Option (Alt)** key, and choose **Library**.
4. Browse to **/ApplicationSupport/VSMSSoftware/TruE3/System**.
5. Copy the file **AnimationPath.txt** to your backup location.

GE044 Where are my recent pictures?

I recently captured an image using a camera in a **TruE 3 Assistant**.

Images that have recently been captured using your webcam in one of our TruE 3 Assistants can be found in **/User]/Library/Containers/com.apple.ImageKit.RecentPictureService/Data/Library/Images/Recent Pictures**.

This location may not be visible on your Mac®, but you can find it using the following steps.

To Manage Recent Pictures Taken By Your Webcam

1. Open the **Finder** window.
2. Open the **Go** menu.
3. Hold down the **Option (Alt)** key, and choose Library.
4. Browse to
/User]/Library/Containers/com.apple.ImageKit.RecentPictureService/Data/Library/Images/Recent Pictures.
5. Open the **View** menu in **Finder**.
6. Click on the **as Icons** option to have a better view of the individual images.
7. Manage the .png or .tiff files in that folder as needed.

GE045 Exporting SHV designs to my USB Embroidery Stick seems slow.

The process of exporting SHV designs to a USB Embroidery stick may take up to a few minutes.

When the 'Exporting to USB Stick' progress bar disappears; then the designs have written to the USB Embroidery Stick.

Be sure to go to **Finder** and *Eject* your USB Stick before removing it from the computer and inserting it into your Designer 1 USB machine.

GE046 When I export SHV files to my USB Embroidery Stick, it does not appear to have written the designs to the USB Stick.

It may be that your USB Embroidery Stick is running very low on space.

It is advisable to format your USB Embroidery Stick to ensure that it has enough space for your SHV designs to be written.

*The following formatting process will delete **ALL** files/folders from your **USB Embroidery Stick**. If you have any files/folders that you wanted to keep, then backup them up before proceeding with the following procedure.*

1. Eject and then remove all USB Sticks/Hard Disk from your Mac®.
2. Insert your **USB Embroidery Stick** that you would like to format.
3. Open **Finder**.
4. Click on the **Go** menu.
5. Click on the **Home** option.
6. Browse to the **.../TruEmbroidery3/Samples/Finder/Stitch/Animals**
7. **Control+click** on any .vp3 file shown. A context menu will appear.
8. Move your mouse to the **Services** sub-menu
9. Click on the **TruE 3 Convert** option. A **TruE 3 Convert** box should appear.
10. Click on the ... button in the **Output File Type** section.
11. Select **Husqvarna Viking Designer 1 (.shv)** from the list.
12. Click on the **USB Stick** icon in the **Select Device** section
13. Click on the **Format** button in that section. A warning will appear.
14. After you have read and accepted the warning, click **Yes** to start the Formatting process.
15. The formatting process should take less than a minute.
16. When it is complete, try to export your SHV designs again to the USB Embroidery Stick.

GE047 How do I change the measurement in the TruE 3 software?

The measurements are taken from the settings on the Appearance tab in the **TruE 3 Configure**.

To change those settings, do the following:

1. Go to the **Launchpad**.
2. Open **TruE 3 Configure**.
3. Click on the **Appearance** tab.
4. From the **Show Measurements In:** section, either choose **Millimeters (mm)** or **Inches (")**.

GE048 I have a Husqvarna Viking Designer I machine; how do I create a SHV design?

You would need to choose **Husqvarna Viking Designer I** from the **Export** dialog:

1. Click on the **File** menu
2. Choose **Export**.
3. Select **Husqvarna Viking Designer I (.shv)** from the drop-down list.
4. Depending on which device (**floppy disk** or **USB Embroidery Stick**) you are write to, you will click on the appropriate icon for that device.
5. **[Optional] to backup the items already on your floppy disk/USB Embroidery Stick; click on the Read Stick or Disk button and then choose the location to save your backup to.**
6. Click on the **Next** button to start writing to that device.

n.b. The instructions above are only applicable to **TruE 3 Elite** or **TruE 3 Elements** owners with activated dongles.

GE049 I cannot see all my TruE 3 icons in Launchpad.

Launchpad shows the icons for all your installed software on your **Mac®** computer.

Depending on how many apps you have installed on your **Mac®**; the icons may span more than one page in **Launchpad** .

When there is more than one page of icons available in **Launchpad** , there will be a number of 'dots' – representing all the available **Launchpad** pages. The dot for the current page will be highlighted, click on one of the other [dots] to navigate between pages.

HD001 How do I find the latest dongle drivers?

The latest dongle drivers (v7.40) can be found by opening **TruE3 Configure** and then clicking on the **Smart Update** button.

The dongle drivers allow compatibility with the latest Mac® OS X El Capitan operating system.

IN001 This package will run a program to determine if the software can be Installed.

This message appears when installing the Samples or Bonus Designs. Click Continue to proceed with the installation if the dongle has already been activated. Otherwise, activate your dongle, and then install the Samples or Bonus Designs.

IN002 Activated dongle not found: Your dongle must be Registered and Activated for TruEmbroidery™ 3 Software before installing the samples.

This message appears if you try to install the Samples or Bonus Designs before activating your dongle. Install TruEmbroidery™ 3 Software and activate your dongle before installing the Samples or Bonus Designs.

IN021 Where are my samples/backgrounds/documents/bonus designs?

When installing any of the TruEmbroidery™ 3 Software samples/backgrounds/documents/bonus designs the files should be installed in subfolders of the folder `/Users/Home/TruEmbroidery3/` (where *Home* means the account of the user you are logged in as), however occasionally this may not be the case. This will result in your samples/backgrounds/documents/bonus designs being installed into the root of your hard disk, for example Macintosh HD.

If this occurs, you may either load the samples from their current location, or move/copy the folder(s) to the correct location.

Please note that by default the Mac® will replace the content inside the folder, therefore it is recommended to make a copy of your files before replacing.

IN023 Since upgrading to MacOS Catalina, my work area does not appear when I open some TruE3 modules

When opening **TruE3 Studio** or **TruE3 Create**, the module opens (and shows the menus), but the work area does not appear.

[These instructions are not required on any Mac operating system version earlier than MacOS Catalina (10.15)]

You will need to:

- Download the [MacOS Catalina - TruE3 Patch](#)
- Follow the instructions in the following video to resolve the issue - [MacOS Catalina TruE3 patch video](#)

If your installed TruE3 Software is not at version 3.2; you can download the latest [TruE3 Software 3.2](#) from here and then install it.

Depending on the setup of your computer/device, the video may view in your browser, or download the file. If the file is downloaded, you will be required to find and open the downloaded video file.

IN024 "This package is incompatible with this version of macOS."

You may receive this error message when trying to install the older dongle drivers for TruE3 onto macOS Catalina.

If you receive this message, you should download and install the latest [TruE3 Dongle Drivers](#)

RE001 How do I change my personal information for my software registration?

Simply click the Register button in TruE™ 3 Configure and repeat the registration process. This does not change the registration status of software you have already registered, but it does allow you to change your personal information and/or dealer information.

Ensure your dongle is connected to your computer before you start, so that your current registration details can be easily retrieved.

If your dongle is not connected, you will need to enter your e-mail address and password to find your registration details.

ST004 ColorSort does not work for the multi-color monogram that I created

When creating multi-color lettering, ensure that the Trim Connection is selected. If Running Connection is selected, you will not be able to ColorSort the lettering.

ST006 When I ColorSort an embroidery the number of color blocks produced varies

The ColorSort process does not just put the same color blocks together. It checks for overlap between areas, therefore depending on the overlaps, the final number of color blocks may vary, even if you are Combining a similar number of SuperDesigns or monograms.

ST011 Error: "Embroidery is too large or is not in the hoop"

This message appears if an embroidery you are trying to Export is outside the selected hoop or larger than will fit in it. For example, with the 100mm x 100mm hoop selected, an embroidery smaller than 100mm x 100mm might

be placed partially outside the work area when you Export. This message would then appear. Move the embroidery completely within the four blue corners of the work area and try again.

ST012 Error: "Embroidery is too large or is not in the hoop" when printing

This error can occur when an embroidery design(s) are partially outside of the hoop area when you try to print. Move the design(s) so that they are entirely within the hoop area; or alternatively use a larger hoop.

ST018 The embroidery I want to work with appears too small on the screen

Make sure the TruE 3 Studio window is maximized by clicking the Maximize icon on the title bar. Click Zoom To Fit to expand the hoop so it fills the work area. Also, choose a Hoop Size in Hoop Selection that is suitable to the embroidery size.

ST019 I find it hard to select the part of the embroidery I wish to edit

Many functions of TruE 3 Studio can be used to help see sections of embroideries more easily. They include the Zoom Commands. The different methods of selection (Box Select, Freehand Select, Polygon Select and Select All) are also useful for different situations.

ST029 I have increased the Gap setting, but the lowercase characters are still touching each other

For script fonts, the Gap setting has no effect on adjacent lowercase characters. Script fonts use a special 'continuous' joining method, which places lowercase characters adjacent to each other to give the appearance of handwriting. All the fonts in the Script category use this joining method.

ST030 All the lettering appears in uppercase, even though I have typed lowercase characters in the Letters box

You are using an uppercase font. In an uppercase font (with UC in the name), all the lowercase characters are identical to the uppercase characters.

ST038 I have selected the correct hoop size, but the graphical representation does not look the same as my real hoop

This will happen if you choose a Universal Hoop that is the same size. The Universal Hoops are shown as plain hoops of the selected size. Use Hoop Selection to choose the desired hoop size, but do not choose a Universal Hoop.

TC009 The fill shape created with QuickStitch™ Fill when I click inside the area is not the one I want

The pictures used should have well differentiated color areas, which should be solid, to fill easily. Clip art is excellent for this purpose.

If **Color Tolerance** is switched off then switch it on in **TruE 3 Create** menu -> **Preferences...** -> **Color Tolerance for QuickStitch Tools** checkbox. **Color Tolerance** will then allow you to preview any area for **QuickStitch™** functions, which should reveal any problems with color areas in the picture. Alter the picture before reloading it as a Background image. Alternatively, use the **FreeHand™ Fill** functions to place the Fill Area.

TC010 How do I change the color of the border of my FreeHand™ or QuickStitch™ fill area?

To change the color of the border, create the fill area using **QuickStitch™ Fill** functions. Both the fill area and the border will use the current thread color.

1. Select the Fill area that you would like to edit.
2. **ctrl + click** to bring up the context menu.
3. Click **Properties** to bring up the Fill Properties dialog for that Fill area.
4. Click on the **Line** tab.
5. Select the Insert Color Change option.
6. Click on the **Color Selection** button - three colored circles; this will bring up the **Color Selection** dialog.
7. Select your Thread Color.
8. Click **OK** to close the Color Selection dialog
9. Click **OK** again to close the Fill Properties dialog.

Your work area will now show the object has a separate color for the border.

TC024 Error "Trace Failed. Maybe the image is too thick?"

This happens when you use **QuickTrace** to follow an outline in the picture and then **QuickTrace** finds a part of the outline that is very thick. This can be caused by excessively broad outlines or by selecting too much of the picture with a high **Color Tolerance** value. In this case, **QuickTrace** does not know where to trace the outline as the problem part of the outline is more like a fill area.

Try using a lower **Color Tolerance** value

TC029 The border shape created with QuickStitch™ functions when I click inside the area is not the one I want

Use Color Tolerance to preview the area that will be used.

- Solid Colors. A solid color area must have well defined edges, either by having an outline of a different color or by being enclosed by other colors. **Color Tolerance** will show where there are gaps in a border around an area.
- Stippled Colors. Stippled colors (also called 'dithered' colors) are treated the same as solid color areas.
- Graduated Colors. If **Color Tolerance** is switched off then you will only be able to select a small, single colored part of a graduated color. It is also easier to select a graduated color area when it is enclosed by contrasting colors.

Color Tolerance is switched on with the **Color Tolerance for QuickStitch Tools** option in **TruE 3 Create** menu - > **Preferences...**

Alternatively, use the relevant Freehand™ function.

TC061 I did not select all the objects I wanted with Box, Polygon or Freehand Select

Objects must be fully enclosed by the selection line to be selected as part of a block. If even the smallest part of an object is outside the line then it will not be selected.

TC064 I have created satin Border with Satin Line Trace but I can't change the width of it all at once

Use the **FilmStrip** and/or slider bars to hide all objects except the satin borders and traveling running stitch used to create the trace. Select any satin border object in the trace, then ctrl-click in the **FilmStrip** and select **Global Properties**. The **Satin Line** properties dialog box will appear. Make adjustments as desired and click **OK**. The new properties will be applied to all visible satin borders.

TC065 Color Tolerance does not show me all the lines that will be traced by a QuickTrace function

The dashed line used by **Color Tolerance** only shows the outside of the area that is selected by the current **Color Tolerance** value. Simply try the QuickTrace function and if the result is not satisfactory then Undo the result and retry the trace with a higher **Color Tolerance**.

TC066 There is no underlay under a fill area

This will happen when you select Gradient or Multi-Gradient Density for a fill area. Underlay stitches are only generated for fill areas with Normal Density selected. This is because the underlay stitching will spoil the effect of Gradient or Multi-Gradient Density. With Normal Density selected, some fill areas with intricate outlines or complex holes may not be able to create underlay.

TC067 The Gradient or Multi-Gradient Density on my fill area does not change very smoothly

If you have a fill area with a complex outline then this may cause the stitches to fill unevenly when you select Gradient or Multi-Gradient density. This is because of the way that the edge of the area interferes with the ideal spacing of the stitches. Gradient and Multi-Gradient density work best for areas with straight or smoothly curving sides. You could replace the Fill Area with a Freehand™ Fill, or edit the area to straighten the side that causes the uneven stitches.

TC077 I am looking for the origin of my fill or specialty fill area, but there is no orange circle.

The origin is usually shown as a medium orange circle. The origin can be moved anywhere on the work area. Try Zoom To Fit to see the whole work area.

TC078 The size of my embroidery in the dialog box is bigger than the height or width I entered, or the hoop size.

If you edit the outermost areas of a design, for example by changing continuous satin to feathered satin, the size of the actual embroidery may exceed the original height or width of the design

TC079 The fill shape created with QuickStitch™ when I click inside the area is not the one I want."

The pictures used should have well differentiated color areas, which may be solid or stippled, to fill easily. Clipart is excellent for this purpose. If there is a gap where the same color flows into another area, the fill will not work as expected. If Color Tolerance is switched off then switch it on in Preferences. Color Tolerance will then allow you to preview any area for QuickStitch™ functions, which should reveal any problems with color areas in the picture. You can then alter the picture in a picture editor such as Preview. Alternatively, use the Freehand Fill functions to place the Fill Area.

TC080 None of the picture is selected for QuickStitch™ when I click inside a small color area."

QuickStitch™ will not create an area from part of the picture that is very small or very thin. This is because the area will either have insignificantly few stitches, or it is not wide enough for stitches to go across it. Use Color Tolerance, or try editing your picture to enlarge the area, so that it is big enough to be used as a QuickStitch™ area. Alternatively, use single or running stitches. For thin lines, use one of the Trace functions.

TC081 I am looking for the origin of my fill area, but there is no orange circle.

The origin for a Pattern, Shape, Radial or Spiral fill is usually shown as an orange circle. It may be a different color, depending the underlying picture or background colors. Also, the origin can be moved anywhere on the work area. Try Zoom To Fit to see the whole work area.

TC082 When I create stitches one of my fill areas doesn't fill completely with stitches."

Try changing the angle of orientation. Even one degree can be enough to allow the artificial intelligence of the program to fill the object. Another possibility is to move the start point slightly.

TC083 When I use motif fill areas, the design takes a long time to appear.

On slower computers, large or complex motif fill areas may take some time to draw, particularly if there are holes in the area. This may be noticeable when you create new motif fill areas and when you return to TruE™ 3 Create from another TruEmbroidery™ 3 Software app.

TC084 The border line created by QuickStitch™ Satin Line/Running Stitch/Double Stitch/Triple Stitch when I click inside an area is not the one I want.

The pictures used should have well differentiated color areas, which may be solid or stippled, to fill easily. Clipart is excellent for this purpose. If there is a gap where the same color flows into another area, the fill will not work. If Color Tolerance is switched off then switch it on in Screen Preferences. Color Tolerance will then allow you to preview the border, which should reveal any problems with color areas in the picture. You can then alter the picture in a picture editor such as Preview. Alternatively, use the Freehand Border functions to place the border.

TC085 I am trying to change colors for some objects but they don't appear on the color worksheet in the Edit window of the Control Panel.

Colors for multicolor gradient density may only be edited by selecting the pattern fill area and changing its properties. Similarly, the border color for a fill plus border area is on the line tab in the properties box.

TC086 I have inserted a new point and moved an outline but there is still an outline in the old position.

Some functions in the Create window create more than one outline at a time, such as Double and Quadruple Trace. For example, Quadruple Trace puts lines of triple and running stitches directly on top of each other. This means that if you want to add and move a new point to change a Quadruple Trace then you will have to do so twice, once for each of the lines. This could also happen if you used Break Apart on a fill area with border, and then moved one of its points.

TC087 I have pasted a block but it is not the original color.

A color change is only copied when it is part of the selected block. If you paste a block that does not start with a color change then it will use the color that is active at the point where the block is pasted. If you want to preserve the color, either copy the relevant color change or use the FilmStrip to insert the desired color.

TC088 All of my design turned blue when I used Paste into New Window.

Color changes are only transferred if they are within the copied block. If there are no Color changes in a pasted block then all the objects will use the initial thread color for a new design, which is blue.

TC089 I did not select all the objects I wanted with Box, Polygon or Freehand Select."

Objects must be fully enclosed by the selection line to be selected as part of a block. If even the smallest part of an object is outside the line then it will not be selected.

TC090 I have created a satin border with Satin Trace but I can't change the width of it all at once."

Use the FilmStrip, slider bars and Filters to hide all objects except the satin lines and traveling running stitch used to create the trace. Select any satin line object in the trace, then Control-click in the FilmStrip and select Global Properties. The properties dialog for Satin Line will appear. Make adjustments as desired and click OK. The new properties will be applied to all visible satin lines.

TC091 Color Tolerance does not show me all the lines that will be traced by a QuickTrace function.

The hatched shading used by Color Tolerance may not show on thin lines that are selected by Color Tolerance. Simply try the QuickTrace function and if the result is not satisfactory then Undo the result and retry the trace with a higher Color Tolerance value.

TC092 There is no underlay under a fill area.

This will happen when you select Gradient or Multi-Gradient Density for a pattern fill area. Underlay stitches are only generated for fill areas with Normal Density selected. This is because the underlay stitching will spoil the effect of Gradient or Multi-Gradient Density.

TC093 How do I change the border color for a fill area?

The border forms part of a fill area. To change the color of a fill area border, do as follows:

1. Select a fill area with a border.
2. Control-click the fill area and choose Properties from the context menu.
3. Click the Line tab.
4. Select Insert Color Change, then click Color Selection .
5. In the Color Selection dialog select a new thread color for the border.
6. Click OK twice to close the Color Selection dialog and the Properties dialog. The fill now has a differently colored border.

TC094 How are trims and ties added to my design?

When you export your design as an embroidery, trims and ties are automatically added between objects.

TC095 The data is from an incompatible version.

The design outline file was created by a later version of TruE™ 3 Create, or is corrupt. Refer to source of this file for a solution.

TC096 Some incompatible data was lost.

The design outline file was created by a later version of TruE™ 3 Create, or is corrupt. The design may behave unpredictably. Refer to source of this file for a solution.

TC097 The data is not in the correct format.

The design outline file was created by a later version of TruE™ Create, or is corrupt. Refer to source of this file for a solution.

TC098 Insert Design Error. Failed to load the supplied EDO file.

This message appears if an .edo file cannot be inserted. For example, it might have the extension .edo, yet not be a proper design outline file.

TC099 Trace Failed. Maybe the image is too thick?

This happens when you use one of the Trace tools (Double Trace, Quadruple Trace, Satin Line Trace or Motif Line Trace) to follow an outline in the picture and then Trace finds a part of the outline that is very thick. This can be caused by excessively broad outlines or by selecting too much of the picture with a high Color Tolerance value. In this case, Trace does not know where to trace the outline as the problem part of the outline is more like a fill area. Use a lower Color Tolerance value, or change the picture in a picture editor to make the outline thinner or break up the outline so that the wide parts are isolated from the rest of the outline.

TC100 The start and end points do not line up; add a stitch or rotate?

This message may appear when exporting a running stitch design as a motif, or as a Machine Stitch. Motifs and machine stitches are usually designed to stitch from left to right, and to start and finish at the same level. This function allows you to add a stitch, or rotate the design, to ensure the start and end points line up.

TC101 Delete this motif, are you sure?

This message will appear if you click Delete in the My Motifs part of the Motif window. These are motifs that you created. If you do not want to delete the selected motif, click No.

Note: The Delete button is dimmed when system motifs are used, or if only one motif is present in My Motifs.

TC102 Machine Stitch. Only Running Stitch lines can be used to create a machine stitch. Please change your selection or convert objects to Running Line.

This message appears if you try to Export or Send a design as a machine stitch if it contains any stitch type other than running stitch, or no stitches at all. Only use running stitch when creating machine stitches.

TC103 Error Adding Motif. Only Running Stitch lines can be used to create a motif. Please change your selection or convert objects to Running Line.

This message appears if you try to create a motif from a design if it contains any stitch type other than running stitch, or no stitches at all. Only use running stitch when creating motifs.

TC104 Error Saving Spx. Unable to open the spx file for writing.

This message appears if, for instance, you try to save a machine stitch to a read only medium such as a CD-R. A CD-R is read only, therefore you will not be able to save the design.

TC105 XX.spx already exists. Do you want to replace it?

This message appears if a machine stitch you are trying to Save has a name that has already been used. Replace the existing stitch, or choose a new name before saving.

TC106 Failed to create stitch data.

This message appears if you try to Export a design as a machine stitch and the stitch cannot be created. Check that your design consists of only running stitch lines.

TC107 Failed to save stitch file.

This message appears if you try to Export a design as a machine stitch and the stitch cannot be saved. Check that your design consists of only running stitch lines, and try saving the stitch under a different name in a different place.

TC108 The value '*' is invalid. Please provide a valid value.

This message appears in the following circumstances:

- If the Density for Satin Line is below 2mm or above 15mm, or is not a number.
- If the Density for Continuous Satin, Satin Area, MultiWave Fill or Pattern Fill is below 2mm or above 40mm, or is not a number.
- If the Density for Shape Fill, Radial Fill or Spiral Fill is not a number.

TC109 The value * is too large. Please provide a valid value.

This message appears in the following circumstances:

- If the value entered in the Compensation box in the Continuous Satin, Satin Area or Pattern Fill dialog is greater than 30.
- If the value entered in the Angle box in the Pattern Fill, Crosshatch Fill or Motif Fill dialog is greater than 360°.
- If the value entered in the Density box in the Shape Fill, Radial Fill or Spiral Fill dialog is greater than 40.
- If the value entered in the Horizontal or Vertical Gap box in the Motif Fill dialog is greater than 100%.
- If the value entered in the Horizontal or Vertical Offset box in the Motif Fill dialog is greater than 50%.

TC110 The value * is too small. Please provide a valid value.

This message appears in the following circumstances:

- If the value entered in the Compensation box in the Continuous Satin, Satin Area or Pattern Fill dialog is smaller than 0.
- If the value entered in the Angle box in the Pattern Fill, Crosshatch Fill or Motif Fill dialog is smaller than 0°.
- If the value entered in the Density box in the Shape Fill, Radial Fill or Spiral Fill dialog is smaller than 2.
- If the value entered in the Horizontal or Vertical Gap box in the Motif Fill dialog is smaller than -50%.
- If the value entered in the Horizontal or Vertical Offset box in the Motif Fill dialog is smaller than -50%.

TC111 The value '*mm' needs to be in the range 0.0 to 20 mm. Please provide a valid value.

This message appears if the size entered in the Minimum Gap box in the Motif Line dialog, or the Motif section of the MultiWave Fill or Shape Fill dialog is below 0mm or above 20mm.

TC112 The value '*mm' needs to be in the range 0.1 to 12 mm. Please provide a valid value.

This message appears if the size entered in the Zigzag Width box in the Double Stitch With Zigzag Return dialog or the Crosshatch Fill dialog is below 0.1mm or above 12mm, or is not a number.

TC113 The value '*mm' needs to be in the range 0.2 to 5 mm. Please provide a valid value.

This message appears if the size entered in the Spacing box in the Contour Fill dialog is below 0.2mm or above 5mm.

TC114 The value '*mm' needs to be in the range 0.3 to 6 mm. Please provide a valid value.

This message appears if the size entered in the Length box in the Running Stitch dialog is below 0.3mm or above 6mm, or is not a number

TC115 The value '*mm' needs to be in the range 1 to 5 mm. Please provide a valid value.

This message appears if the size entered in the Spacing box in the QuiltStipple Fill dialog is below 1mm or above 5mm, or is not a number.

TC116 The value '*mm' needs to be in the range 1 to 6 mm. Please provide a valid value.

This message appears if the size entered in the Length box in the Double Stitch, Double Stitch With Zigzag Return or Triple Stitch dialog, or the Stitch Length box in the MultiWave Fill, Motif Fill, Shape Fill, Crosshatch Fill, QuiltStipple Fill or Contour Fill dialog is below 1mm or above 6mm, or is not a number.

TC117 The value '*mm' needs to be in the range 1 to 12 mm. Please provide a valid value.

This message appears if the size entered in the Width box in the Satin Line dialog is below 1mm or above 12mm, or is not a number.

TC118 The value '*mm' needs to be in the range 1 to 20 mm. Please provide a valid value.

This message appears if the size entered in the Stitch Length box in the Motif Line dialog is below 1mm or above 20mm, or is not a number.

TC119 The value '*mm' needs to be in the range 2 to 20 mm. Please provide a valid value.

This message appears if the size entered in the Spacing box in the Crosshatch Fill dialog is below 2mm or above 20mm, or is not a number.

TC120 Lettering Error. The character - XX - is not in the font. Please enter a valid character.

This message appears if the character selected is not in the font. Such characters include square brackets [] and braces {}. Select a valid character from the popup menu.

TC121 Lettering Error. You must type in a character to create.

This message appears if there is no character in the Letter text box. Enter a valid character, or select a character from the popup menu.

TC122 The value '*mm' needs to be in the range 3 to 200 mm. Please provide a valid value.

This message appears if the size entered in the Size box in the Insert Letter dialog is below 3mm or above 200mm, or is not a number. The Size setting refers to the height in millimeters of an uppercase 'A' in the selected font. If you wish to increase letter above this you could click and drag one of the corner boxes to resize or rescale it.

TC123 Could not create new document for 'Paste into New Window'

This message appears if the object pasted from the Clipboard is not stitch data. It may be from another app. Make the selection again, then copy and paste it.

TC124 The document XX could not be saved. No stitch data to save.

This message appears if there are no stitches in your embroidery design. For instance, if you deleted the embroidery and then tried to save it.

TC125 XX.edo already exists. Do you want to replace it?

This happens when you are doing a Save on an .edo design outline file and you have given the name of a file that is already there. Click Cancel or Replace as appropriate.

TC126 Only Running Stitch lines can be used to create a machine stitch. Please change your selection or convert objects to Running Line.

This message appears if you try to Export or Send a design as a machine stitch if it contains any stitch type other than running stitch, or no stitches at all. Only use running stitch when creating machine stitches.

TC127 Clicking on the Register, Activate Dongle or Smart Update buttons have no effect

This may occur on an existing installation of the TruE 3 Embroidery System as a result of upgrading to the latest **Mac OS Update**

To resolve this issue; do the following steps:

1. Go to <http://www.truembroidery.com>
2. Click on the **Downloads** link at the top of the page.
3. Click on the **True 3 Download Portal** button.
4. Enter your registered **E-mail Address**.
5. Enter your **Password**. Click **Next**.
6. Click **Next** again.
7. In the **TruEmbroidery 3 Software** section, download the latest **TruEmbroidery3Software32.pkg** file.
8. Close down all TruEmbroidery 3 System Apps.
9. Install the **TruEmbroidery3Software32.pkg** file that you just downloaded.
10. Open **TruE 3 Configure** and confirm that clicking on the **Register, Activate Dongle** and **Smart Update** buttons now open up a window in the background.

TC129 Delete My Fill: Are you sure you want to delete the selected pattern? This action cannot be undone.

This message appears when you delete a My Fill pattern from the Manage My Fills dialog. Click Yes or No, as desired.

TC130 Import Failed: Cannot load picture XX. The width and height must be between 120 and 700 pixels.

This message appears when you import a picture for a My Fill, but the picture is too large. Click OK to close the message, and resize the picture in a picture editor before trying again.

TC131 Unable to Export My Fill image.

This message appears when you try to Export a My Fill picture, but the picture cannot be exported. For example, if you tried to save it to a CD-R. Click OK to close the message, and choose another place to save the picture before trying again.

TQ001 How do I delete fonts that I have created in TruE 3 QuickFont?

This needs to be done using Finder.

1. Open **Finder**.
2. Click on the **Go** menu.
3. Hold down the **ALT/Option** button on your keyboard.
4. Click on the **Library** option that now appears in the list.
5. Browse to the **.../Application Support/VsmSoftware/TruE3/System/Fonts/My Fonts** folder.
6. Delete the font[s] that you no longer need - also be sure to delete the accompanying .png file for that font file.

TQ002 How do I create my own fonts in the *TruE 3* software?

This can be achieved using *TruE 3 QuickFont*.

Open *TruE 3 QuickFont* from the **Launchpad** or via the **Letter** tab of the *TruE 3 Studio Control Panel*.

TruE 3 Machine

Listed versions: 3.0

CC001 Warning. Some TruE 3 apps still appear to be running. Do you really want to reset all modules?

This message is displayed if you select Reset All Apps in the Utilities tab while other TruEmbroidery™ 3 Software apps are running. Click Cancel, or use Quit Open TruE 3 Apps to close all open apps.

EC003 Can I have the TruE™ 3 Machine app automatically start when I turn on my computer?

Yes, you can by using the following instructions:

1. Click on **System Preferences** from your **Dock** - the icon that looks like a cog.
2. In the **System**, click on the **Users & Groups** icon.
3. Ensure that your user account (listed near the top left section of that window, under **Current User**) is selected.
4. Click on the **Login Items** tab - on the right hand pane of that window.

5. Click on the **+** icon on the right hand pane of that window. An Open dialog will appear.
6. On the left hand pane - under the **Favorites** section; click on the **Applications** entry.
7. In the right hand pane, scroll down the list of apps until you come to the **TruE™ 3 Machine** entry.
8. Select the **TruE™ 3 Machine** entry and click on the **Add** button.
9. You will now see **TruE™ 3 Machine** in the list of items that will automatically start when you log in.
10. Close **System Preferences/Users & Groups**.

When you next log into your computer; the **TruE™ 3 Machine** app will automatically run.

EC004 Can I connect more than one embroidery machine to my computer with TruE™ 3 Machine?

No, you are not able to connect two embroidery machines at the same time, and to send a design to the first embroidery machine and then to the second embroidery machine.

If you want to send an embroidery to two machines, do as follows

1. Send the design to the first machine.
2. Disconnect the USB connection between your **Mac** and that embroidery machine.
3. Connect a USB cable between your second embroidery machine and your **Mac**.
4. Send a design to that second embroidery machine.

EC005 I cannot send a design to my embroidery machine.

First, confirm that the TruE™ 3 Machine app is running. TruE™ 3 Machine appears as a machine icon in the menu bar.

If TruE™ Machine is not running, start it.

- Click the TruE™ 3 Machine icon in the Launchpad , or double-click the TruE™ 3 Machine icon in the Finder

Second, confirm that the TruE™ 3 Machine app is communicating with your embroidery machine.

- Click the machine icon in the menu bar and check that your embroidery machine is listed in the menu. If it is not, check the USB connection, then choose Quit and start TruE™ 3 Machine again.

Note: If the USB connection between your embroidery machine and computer is temporarily interrupted, you may need to restart TruE™ 3 Machine.

EC006 I have sent a design to my embroidery machine, but nothing is happening.

You can only send a design directly to your embroidery machine if the following folder exists:

/[Home]/TruEmbroidery/TempSend.

If this folder does not exist, do as follows:

1. Open a Finder window.
2. Choose **Go > Home**.
3. Click the **TruEmbroidery** folder to open it.
4. **Control-click** an empty area of the screen and choose **New Folder** from the context menu.
5. Name the new folder **TempSend**.
6. Send the design again.

Now try to send the design again.

EC008 I exported my embroidery to my USB stick, but I cannot browse to it on my embroidery machine.

Your embroidery machine may not be able to read USB sticks with a large capacity. Check the manual for your embroidery machine for information on limitations on the size of USB stick memory.

EC009 I exported my embroidery to my USB stick, but I cannot find it when I browse the stick on my embroidery machine.

You may need to place the embroidery within a particular folder on your USB stick. For example, on the Janome MC350E the embroidery files must be placed in the EMB5 folder, while for the MC11000 and MC12000 they must be placed in the Embf folder.

GE002 Some of the items in a menu are dimmed.

Certain items (for example Undo in the Edit menu) are only available once an embroidery design is shown on the screen.

GE005 I can't see the toolbar or some of the icons.

Use Reset All Apps in TruE™ 3 Configure to return the toolbar and windows in the app to their default settings.

To return the icons in the toolbar to their default settings, choose View > Customize Toolbar, and drag the default icon set into the toolbar.

To use Reset All Apps:

1. Ensure your designs are saved in any TruEmbroidery™ 3 Software apps that are open.
2. Click the TruE™ 3 Configure icon in the Launchpad, or double-click the TruE™ 3 Configure icon in the Finder.
3. Click the Utilities tab.
4. Click Reset All Apps.
5. Click the Quit Open TruE 3 Apps button to close all open apps.
6. Click the Reset All Apps button.

Note: If some TruE 3 apps are still open, a message will appear, saying that some apps appear to be running. Click OK to close all running TruE 3 apps, or click Cancel.

The toolbar and windows in your app will have been restored to their original state.

Note: If preferred, to check the toolbar choose View, then choose Show Toolbar if the toolbar has been hidden, or choose Customize Toolbar to reset the toolbar if icons have been added to or removed

GE010 No dongle attached. Cannot open or use application (7).

This message will appear when trying to start an app if the TruEmbroidery™ 3 Software cannot detect the dongle (data protection device). Ensure the dongle is plugged into a free USB port of your computer

GE011 No dongle attached. Cannot open or use application (33).

This message may appear if you try to use TruE™ 3 Create shortly after starting or logging into your computer, before the system is fully ready. Wait for a few seconds and try again.

GE026 Not enough memory available to perform function.

This message will appear when system resources are low. Close other apps and try again. If this does not work, try restarting your computer.

GE031 Not enough memory available to perform function.

This message may appear if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE044 Where are my recent pictures?

I recently captured an image using a camera in a **TruE 3 Assistant**.

Images that have recently been captured using your webcam in one of our TruE 3 Assistants can be found in **/User/Library/Containers/com.apple.ImageKit.RecentPictureService/Data/Library/Images/Recent Pictures**. This location may not be visible on your Mac®, but you can find it using the following steps.

To Manage Recent Pictures Taken By Your Webcam

1. Open the **Finder** window.
2. Open the **Go** menu.
3. Hold down the **Option (Alt)** key, and choose Library.
4. Browse to **/User/Library/Containers/com.apple.ImageKit.RecentPictureService/Data/Library/Images/Recent Pictures**.
5. Open the **View** menu in **Finder**.
6. Click on the **as Icons** option to have a better view of the individual images.
7. Manage the .png or .tiff files in that folder as needed.

GE049 I cannot see all my *TruE 3* icons in **Launchpad**.

Launchpad shows the icons for all your installed software on your **Mac®** computer.

Depending on how many apps you have installed on your **Mac®**; the icons may span more than one page in **Launchpad** .

When there is more than one page of icons available in **Launchpad** , there will be a number of 'dots' – representing all the available **Launchpad** pages. The dot for the current page will be highlighted, click on one of the other dots to navigate between pages.

HD001 How do I find the latest dongle drivers?

The latest dongle drivers (v7.40) can be found by opening **TruE3 Configure** and then clicking on the **Smart Update** button.

The dongle drivers allow compatibility with the latest Mac® OS X El Capitan operating system.

IN001 This package will run a program to determine if the software can be Installed.

This message appears when installing the Samples or Bonus Designs. Click Continue to proceed with the installation if the dongle has already been activated. Otherwise, activate your dongle, and then install the Samples or Bonus Designs.

IN002 Activated dongle not found: Your dongle must be Registered and Activated for TruEmbroidery™ 3 Software before installing the samples.

This message appears if you try to install the Samples or Bonus Designs before activating your dongle. Install TruEmbroidery™ 3 Software and activate your dongle before installing the Samples or Bonus Designs.

IN024 "This package is incompatible with this version of macOS."

You may receive this error message when trying to install the older dongle drivers for TruE3 onto macOS Catalina.

If you receive this message, you should download and install the latest [TruE3 Dongle Drivers](#)

RE001 How do I change my personal information for my software registration?

Simply click the Register button in TruE™ 3 Configure and repeat the registration process. This does not change the registration status of software you have already registered, but it does allow you to change your personal information and/or dealer information.

Ensure your dongle is connected to your computer before you start, so that your current registration details can be easily retrieved.

If your dongle is not connected, you will need to enter your e-mail address and password to find your registration details.

TC127 Clicking on the Register, Activate Dongle or Smart Update buttons have no effect

This may occur on an existing installation of the TruE 3 Embroidery System as a result of upgrading to the latest **Mac OS Update**

To resolve this issue; do the following steps:

1. Go to <http://www.trueembroidery.com>
2. Click on the **Downloads** link at the top of the page.
3. Click on the **True 3 Download Portal** button.
4. Enter your registered **E-mail Address**.
5. Enter your **Password**. Click **Next**.
6. Click **Next** again.
7. In the **TruEmbroidery 3 Software** section, download the latest **TruEmbroidery3Software32.pkg** file.
8. Close down all TruEmbroidery 3 System Apps.
9. Install the **TruEmbroidery3Software32.pkg** file that you just downloaded.
10. Open **TruE 3 Configure** and confirm that clicking on the **Register**, **Activate Dongle** and **Smart Update** buttons now open up a window in the background.

TC129 Delete My Fill: Are you sure you want to delete the selected pattern? This action cannot be undone.

This message appears when you delete a My Fill pattern from the Manage My Fills dialog. Click Yes or No, as desired.

TC132 I would like to get rid of the lines created from the white background of my picture by Linear PhotoStitch embroidery.

After creating and saving an embroidery, use the Edit tab or open the file in TruE™ 3 Modify and use the following instructions.

1. Use the Freehand Block Select feature to mark the stitches in the background.
2. Click Delete Stitches.
3. Save the adjusted embroidery

TruE 3 Modify

Listed versions: 3.0

CC001 Warning. Some TruE 3 apps still appear to be running. Do you really want to reset all modules?

This message is displayed if you select Reset All Apps in the Utilities tab while other TruEmbroidery™ 3 Software apps are running. Click Cancel, or use Quit Open TruE 3 Apps to close all open apps.

EC003 Can I have the TruE™ 3 Machine app automatically start when I turn on my computer?

Yes, you can by using the following instructions:

1. Click on **System Preferences** from your **Dock** - the icon that looks like a cog.
2. In the **System**, click on the **Users & Groups** icon.
3. Ensure that your user account (listed near the top left section of that window, under **Current User**) is selected.
4. Click on the **Login Items** tab - on the right hand pane of that window.
5. Click on the **+** icon on the right hand pane of that window. An Open dialog will appear.
6. On the left hand pane - under the **Favorites** section; click on the **Applications** entry.
7. In the right hand pane, scroll down the list of apps until you come to the **TruE™ 3 Machine** entry.
8. Select the **TruE™ 3 Machine** entry and click on the **Add** button.
9. You will now see **TruE™ 3 Machine** in the list of items that will automatically start when you log in.
10. Close **System Preferences/Users & Groups**.

When you next log into your computer; the **TruE™ 3 Machine** app will automatically run.

EC004 Can I connect more than one embroidery machine to my computer with TruE™ 3 Machine?

No, you are not able to connect two embroidery machines at the same time, and to send a design to the first embroidery machine and then to the second embroidery machine.

If you want to send an embroidery to two machines, do as follows

1. Send the design to the first machine.
2. Disconnect the USB connection between your **Mac** and that embroidery machine.
3. Connect a USB cable between your second embroidery machine and your **Mac**.
4. Send a design to that second embroidery machine.

EC005 I cannot send a design to my embroidery machine.

First, confirm that the TruE™ 3 Machine app is running. TruE™ 3 Machine appears as a machine icon in the menu bar.

If TruE™ Machine is not running, start it.

- Click the TruE™ 3 Machine icon in the Launchpad , or double-click the TruE™ 3 Machine icon in the Finder .

Second, confirm that the TruE™ 3 Machine app is communicating with your embroidery machine.

- Click the machine icon in the menu bar and check that your embroidery machine is listed in the menu. If it is not, check the USB connection, then choose Quit and start TruE™ 3 Machine again.

Note: If the USB connection between your embroidery machine and computer is temporarily interrupted, you may need to restart TruE™ 3 Machine.

EC006 I have sent a design to my embroidery machine, but nothing is happening.

You can only send a design directly to your embroidery machine if the following folder exists:

/[Home]/TruEmbroidery/TempSend.

If this folder does not exist, do as follows:

1. Open a Finder window.

2. Choose **Go > Home**.
3. Click the **TruEmbroidery** folder to open it.
4. **Control-click** an empty area of the screen and choose **New Folder** from the context menu.
5. Name the new folder **TempSend**.
6. Send the design again.

Now try to send the design again.

EC008 I exported my embroidery to my USB stick, but I cannot browse to it on my embroidery machine.

Your embroidery machine may not be able to read USB sticks with a large capacity. Check the manual for your embroidery machine for information on limitations on the size of USB stick memory.

EC009 I exported my embroidery to my USB stick, but I cannot find it when I browse the stick on my embroidery machine.

You may need to place the embroidery within a particular folder on your USB stick. For example, on the Janome MC350E the embroidery files must be placed in the EMB5 folder, while for the MC11000 and MC12000 they must be placed in the Embf folder.

GA002 Error: "Embroidery too large for output file format"

Certain formats are limited to the size of hoop used on their specific embroidery machine, for example .sew. If you attempt to save a file in this format that is bigger than the largest available hoop size this message would appear.

GA003 I have saved my embroidery as Tajima format, but it now has more colors

If your original embroidery had a stop command in it then this would be replaced by a color change, thus adding a color for every stop you have in your embroidery. As the Tajima file format does not have a stop command in its format, it requires the machine operator to manually enter stops into the machine. If you save or distribute files in Tajima format, then you must also specify all colors and stops and where they occur in the embroidery.

GA004 I have saved an embroidery in .sew format, and two files have been created

Janome software cannot load embroideries with more than 12 colors. If a file to be exported in .sew format has more than 12 color changes, it will automatically be split into multiple files, with the last character of the filename "1", "2", and so on.

GE001 I cannot open Melco (.exp) files into the TruEmbroidery 3 software.

The Melco format (.exp) extension is also used by default in the Mac operating system.

Therefore, you would not be able to open those files via the Open dialog.

In order to use Melco files; use Insert/View to use those designs in your TruEmbroidery 3 software.

GE002 Some of the items in a menu are dimmed.

Certain items (for example Undo in the Edit menu) are only available once an embroidery design is shown on the screen.

GE003 I have changed grid color and spacing and now I wish to return to the original settings."

Use TruE™ 3 Configure to change the grid color. Click the Color block and the Colors window appears to allow you to choose a color. The color set by default for your TruEmbroidery™ Software is 127, 127, 127 (RGB). You can use the RGB Sliders in the Colors Sliders tab to return to this color.

Use Preferences to change the grid spacing. Set the Grid Size to 10mm.

GE004 I have changed the screen background color and now I wish to return to the original light blue.

Use TruE™ 3 Configure to change the grid color. Click the Color block and the Colors window appears to allow you to choose a color. The color set by default for your TruEmbroidery™ Software is 211, 233, 255 (RGB). You can use the RGB Sliders in the Colors Sliders tab to return to this color.

GE005 I can't see the toolbar or some of the icons.

Use Reset All Apps in TruE™ 3 Configure to return the toolbar and windows in the app to their default settings.

To return the icons in the toolbar to their default settings, choose View > Customize Toolbar, and drag the default icon set into the toolbar.

To use Reset All Apps:

1. Ensure your designs are saved in any TruEmbroidery™ 3 Software apps that are open.
2. Click the TruE™ 3 Configure icon in the Launchpad, or double-click the TruE™ 3 Configure icon in the Finder.
3. Click the Utilities tab.
4. Click Reset All Apps.
5. Click the Quit Open TruE 3 Apps button to close all open apps.
6. Click the Reset All Apps button.

Note: If some TruE 3 apps are still open, a message will appear, saying that some apps appear to be running. Click OK to close all running TruE 3 apps, or click Cancel.

The toolbar and windows in your app will have been restored to their original state.

Note: If preferred, to check the toolbar choose View, then choose Show Toolbar if the toolbar has been hidden, or choose Customize Toolbar to reset the toolbar if icons have been added to or removed

GE007 When I try to use the numbers box to select a thread number, the wrong thread shade is selected.

The find thread feature in Color Selection allows you to enter partial thread numbers. The first thread in the list matching the number is found, with priority given to an exact match. The existing thread number is also listed. If you are attempting to find a thread with only part of the number, the first thread matched may not be the desired thread. To ensure you select the correct thread, enter the thread number as it appears in the list. Some thread ranges have prefix characters on the thread number. These must also be entered to obtain an exact match.

GE008 A thread in an embroidery from a friend had a different name or number when I first opened it.

The thread name or number is changed when the thread is opened if the Thread Range of the selected color is not found in your thread database. This could happen if the design you are attempting to edit was supplied by someone with a later version of the thread database. The color will be replaced with the nearest match in the Import Thread Range you have set in TruE™ 3 Configure. You can alter it to any other color if desired. To check for the latest updates for the TruEmbroidery™ 3 Software, use Smart Update in TruE™ 3 Configure.

GE010 No dongle attached. Cannot open or use application (7).

This message will appear when trying to start an app if the TruEmbroidery™ 3 Software cannot detect the dongle (data protection device). Ensure the dongle is plugged into a free USB port of your computer

GE011 No dongle attached. Cannot open or use application (33).

This message may appear if you try to use TruE™ 3 Create shortly after starting or logging into your computer, before the system is fully ready. Wait for a few seconds and try again.

GE012 The file XX is locked. If you want to make changes to this document, click Unlock. To keep the file unchanged and work with a copy, click Duplicate.

This message appears when trying to edit an embroidery design outline which is locked, or is on a read-only medium such as a CD-R. Unlock the embroidery design outline before editing, or duplicate it and then edit it, if it is on a read-only medium.

GE013 The file XX is on a read-only volume and cannot be unlocked. You can duplicate this document and edit the duplicate.

This message appears when trying to unlock an embroidery design outline which is on a read-only medium such as a CD-R. Duplicate it, then edit and save it.

GE014 The file doesn't exist.

This message appears if the desired design is not where the app expects it to be, for example if a design was saved to a network drive, then deleted or renamed.

The message would appear if you tried to load the design from the Open Recent list on the File menu.

GE015 Unrecognized file format.

This message appears if the design you are attempting to load is corrupt. For example, it might have the extension .edo, yet not be a proper design outline file.

GE016 Unrecognized file extension.

This message may appear if the design you are attempting to load is corrupt. For example, it might have the extension .edo, yet not be a proper design outline file.

GE017 Background Image Warning. This will remove your existing image, continue?

This message appears if you try to load a background image when an image has already been loaded. Click OK to load a new image, or Cancel to use your existing image.

GE018 Background Image Error. Could not open the background image.

This message appears if you try to load a background image and the picture is corrupt. For example, it might have an extension such as .bmp or .jpg, yet not be a proper picture file.

GE019 The document XX could not be saved as XX. The volume is read only. Try saving the file to another volume.

This message appears if, for instance, you try to save an embroidery design to a CD-R. A CD-R is read only, therefore you will not be able to save the embroidery design. Save the embroidery design to another medium .

GE020 The document XX could not be autosaved. The volume is read only. Try saving the file to another volume. You can also duplicate the document or discard your changes to close it.

This message appears if, for instance, you have loaded an embroidery design from a CD-R and then attempt to save the embroidery design back to the CD. A CD-R is read only, therefore you will not be able to save the embroidery design. Save the embroidery design to another medium .

GE021 The file already exists. Do you want to replace it?

This message appears if an embroidery you are trying to Save has a name that has already been used. Replace the existing embroidery, or choose a new name before saving.

GE022 Embroidery is too large or will not fit in hoop.

This message appears if an embroidery you are trying to Export is outside the selected hoop or larger than will fit in it. For example, with the 100mm x 100mm hoop selected, an embroidery smaller than 100mm x 100mm might be placed partially outside the work area when you choose Export. This message would then appear. Move the embroidery completely within the four blue corners of the work area and try again. Alternatively, change the size of the hoop.

GE023 The file already exists. Do you want to replace it?

This message appears if an embroidery you are trying to Export has a name that has already been used. Replace the existing embroidery, or choose a new name before exporting.

GE024 ExportDesign too large for export format. Exporting XX file failed.

Certain formats are limited to the number of stitches they can save or the size of hoop used on their specific embroidery machine, for example the .sew or Pfaff (.pcs) file format. If you attempt to save a file in this format that is bigger than the largest available hoop size, or has more stitches than are allowed, this message will appear.

GE025 Print. Embroidery is too large or will not fit in hoop.

This message appears if the embroidery on screen is partially outside the selected hoop. Move the embroidery completely within the four blue corners of the work area and try again, or change the hoop size

GE026 Not enough memory available to perform function.

This message will appear when system resources are low. Close other apps and try again. If this does not work, try restarting your computer.

GE027 Not For Sale. This is a Dealer version of the TruEmbroidery™ 3 Software and not for retail sale. If you are not a certified registered TruEmbroidery™ 3

Software dealer you are not entitled to use this software. Please contact your local dealer for further information.

This message means that the app is a dealer only version for demonstration and training purposes, and is not available for retail sale. Please contact software support for further information.

GE028 Could not understand the string XX.

This message appears if the value entered in a number box is outside the valid range, or is not a number.

GE029 The file doesn't exist.

This message appears if the desired embroidery is not where the app expects it to be, for example if an embroidery was saved to a network drive, then deleted or renamed. The message would appear if you tried to load the embroidery from the Open Recent list on the File menu.

GE030 Unrecognized file format.

This message appears if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE031 Not enough memory available to perform function.

This message may appear if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE032 Cannot open stitch file.

This message may appear if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE033 Unrecognized file extension.

This message may appear if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE034 Stitch file is corrupt.

The embroidery is corrupt and cannot be loaded. Refer to source of this file for a solution.

GE035 Stitch file XY coordinates incorrect.

The embroidery is corrupt and cannot be loaded. Refer to source of this file for a solution.

GE036 The document "xx" could not be opened.

This message appears if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE037 The file "xx" is locked. If you want to make changes to this document, click Unlock. To keep the file unchanged and work with a copy, click Duplicate

This message appears when trying to edit an embroidery which is locked, or is on a read-only medium such as a CD-R. Unlock the embroidery before editing, or duplicate it, and then edit it, if it is on a read-only medium

GE038 The file "xx" is on a read-only volume and cannot be unlocked. You can duplicate this document and edit the duplicate.

This message appears when trying to unlock an embroidery which is on a readonly medium such as a CD-R. Duplicate it, then edit and save it.

GE039 Information About Colors in TruEmbroidery™ 3 Software Files

The TruEmbroidery™ 3 Software will display threads in a file in the same way on any computer where it is installed. That is, the colors used will be the same even if they are reproduced slightly differently on different monitors. You can print a worksheet to see the colors and color names used in a particular design. This is true, even if you do not have all the threads in a design defined in the database on your computer. This is because a TruEmbroidery™ 3 Software design has complete information for each of the threads it uses.

Each thread used in a design will fall into one of the following categories:

- A thread from the Thread Database.
- A thread from the Thread Database that is not on your own Thread Database because your database is out of date.
- A custom thread defined in the file that does not appear in your Threads database.

The availability of threads in the Thread Database will only affect parts of the TruEmbroidery™ 3 Software where you can change colors, as follows:

- Editing apps: TruE™ 3 Studio and TruE™ 3 Modify
- Design apps: TruE™ 3 Create
- Adding/Editing Thread: TruE™ 3 Thread Cache
- Generating fonts: TruE™ 3 QuickFont

Below are some situations you may encounter according to the availability of thread definitions, as categorized above.

GE040 I have a design from another user that uses threads from the Thread Database that I do not have.

Use Smart Update to find and download the latest thread database, which you can then install.

GE042 Do you want to remove all points from your demo? This cannot be undone.

This message appears if you use Reset My Demo in Life View. Click Yes to continue, or No to keep your existing My Demo.

GE043 How do I backup a My Demo animation?

The **My Demo** animated preview is stored in the **AnimationPath.txt** file in the folder **/User]/Library/ApplicationSupport/VSMSSoftware/TruE3/System**. This location may not be visible on your Mac®, but you can find it using the following steps.

To Backup a My Demo Animation

1. Open the **Finder** window.
2. Open the **Go** menu.
3. Hold down the **Option (Alt)** key, and choose **Library**.
4. Browse to **/ApplicationSupport/VSMSSoftware/TruE3/System**.
5. Copy the file **AnimationPath.txt** to your backup location.

GE044 Where are my recent pictures?

I recently captured an image using a camera in a **TruE 3 Assistant**.

Images that have recently been captured using your webcam in one of our TruE 3 Assistants can be found in **/User]/Library/Containers/com.apple.ImageKit.RecentPictureService/Data/Library/Images/Recent Pictures**. This location may not be visible on your Mac®, but you can find it using the following steps.

To Manage Recent Pictures Taken By Your Webcam

1. Open the **Finder** window.
2. Open the **Go** menu.
3. Hold down the **Option (Alt)** key, and choose Library.
4. Browse to **/User]/Library/Containers/com.apple.ImageKit.RecentPictureService/Data/Library/Images/Recent Pictures**.
5. Open the **View** menu in **Finder**.
6. Click on the **as Icons** option to have a better view of the individual images.
7. Manage the .png or .tiff files in that folder as needed.

GE045 Exporting SHV designs to my USB Embroidery Stick seems slow.

The process of exporting SHV designs to a USB Embroidery stick may take up to a few minutes.

When the 'Exporting to USB Stick' progress bar disappears; then the designs have written to the USB Embroidery Stick.

Be sure to go to **Finder** and *Eject* your USB Stick before removing it from the computer and inserting it into your Designer 1 USB machine.

GE046 When I export SHV files to my USB Embroidery Stick, it does not appear to have written the designs to the USB Stick.

It may be that your USB Embroidery Stick is running very low on space.

It is advisable to format your USB Embroidery Stick to ensure that it has enough space for your SHV designs to be written.

*The following formatting process will delete **ALL** files/folders from your **USB Embroidery Stick**. If you have any files/folders that you wanted to keep, then backup them up before proceeding with the following procedure.*

1. Eject and then remove all USB Sticks/Hard Disk from your Mac®.
2. Insert your **USB Embroidery Stick** that you would like to format.
3. Open **Finder**.
4. Click on the **Go** menu.
5. Click on the **Home** option.
6. Browse to the **.../TruEmbroidery3/Samples/Finder/Stitch/Animals**
7. **Control+click** on any .vp3 file shown. A context menu will appear.
8. Move your mouse to the **Services** sub-menu
9. Click on the **TruE 3 Convert** option. A **TruE 3 Convert** box should appear.
10. Click on the ... button in the **Output File Type** section.
11. Select **Husqvarna Viking Designer 1 (.shv)** from the list.
12. Click on the **USB Stick** icon in the **Select Device** section
13. Click on the **Format** button in that section. A warning will appear.
14. After you have read and accepted the warning, click **Yes** to start the Formatting process.
15. The formatting process should take less than a minute.
16. When it is complete, try to export your SHV designs again to the USB Embroidery Stick.

GE047 How do I change the measurement in the TruE 3 software?

The measurements are taken from the settings on the Appearance tab in the **TruE 3 Configure**.

To change those settings, do the following:

1. Go to the **Launchpad**.
2. Open **TruE 3 Configure**..
3. Click on the **Appearance** tab.
4. From the **Show Measurements In:** section, either choose **Millimeters (mm)** or **Inches (")**.

GE048 I have a Husqvarna Viking Designer I machine; how do I create a SHV design?

You would need to choose **Husqvarna Viking Designer I** from the **Export** dialog:

1. Click on the **File** menu
2. Choose **Export**.
3. Select **Husqvarna Viking Designer I (.shv)** from the drop-down list.
4. Depending on which device (**floppy disk** or **USB Embroidery Stick**) you are write to, you will click on the appropriate icon for that device.
5. **[Optional] to backup the items already on your floppy disk/USB Embroidery Stick; click on the Read Stick or Disk button and then choose the location to save your backup to.**
6. Click on the **Next** button to start writing to that device.

n.b. The instructions above are only applicable to **TruE 3 Elite** or **TruE 3 Elements** owners with activated dongles.

GE049 I cannot see all my TruE 3 icons in Launchpad.

Launchpad shows the icons for all your installed software on your **Mac®** computer.

Depending on how many apps you have installed on your **Mac®**; the icons may span more than one page in **Launchpad** .

When there is more than one page of icons available in **Launchpad** , there will be a number of 'dots' – representing all the available **Launchpad** pages. The dot for the current page will be highlighted, click on one of the other dots to navigate between pages.

HD001 How do I find the latest dongle drivers?

The latest dongle drivers (v7.40) can be found by opening **TruE3 Configure** and then clicking on the **Smart Update** button.

The dongle drivers allow compatibility with the latest Mac® OS X El Capitan operating system.

IN001 This package will run a program to determine if the software can be Installed.

This message appears when installing the Samples or Bonus Designs. Click Continue to proceed with the installation if the dongle has already been activated. Otherwise, activate your dongle, and then install the Samples or Bonus Designs.

IN002 Activated dongle not found: Your dongle must be Registered and Activated for TruEmbroidery™ 3 Software before installing the samples.

This message appears if you try to install the Samples or Bonus Designs before activating your dongle. Install TruEmbroidery™ 3 Software and activate your dongle before installing the Samples or Bonus Designs.

IN021 Where are my samples/backgrounds/documents/bonus designs?

When installing any of the TruEmbroidery™ 3 Software samples/backgrounds/documents/bonus designs the files should be installed in subfolders of the folder `/Users/Home/TruEmbroidery3/` (where *Home* means the account of

the user you are logged in as), however occasionally this may not be the case. This will result in your samples/backgrounds/documents/bonus designs being installed into the root of your hard disk, for example Macintosh HD.

If this occurs, you may either load the samples from their current location, or move/copy the folder(s) to the correct location.

Please note that by default the Mac® will replace the content inside the folder, therefore it is recommended to make a copy of your files before replacing.

IN024 "This package is incompatible with this version of macOS."

You may receive this error message when trying to install the older dongle drivers for TruE3 onto macOS Catalina.

If you receive this message, you should download and install the latest [TruE3 Dongle Drivers](#)

RE001 How do I change my personal information for my software registration?

Simply click the Register button in TruE™ 3 Configure and repeat the registration process. This does not change the registration status of software you have already registered, but it does allow you to change your personal information and/or dealer information.

Ensure your dongle is connected to your computer before you start, so that your current registration details can be easily retrieved.

If your dongle is not connected, you will need to enter your e-mail address and password to find your registration details.

ST004 ColorSort does not work for the multi-color monogram that I created

When creating multi-color lettering, ensure that the Trim Connection is selected. If Running Connection is selected, you will not be able to ColorSort the lettering.

ST006 When I ColorSort an embroidery the number of color blocks produced varies

The ColorSort process does not just put the same color blocks together. It checks for overlap between areas, therefore depending on the overlaps, the final number of color blocks may vary, even if you are Combining a similar number of SuperDesigns or monograms.

ST011 Error: "Embroidery is too large or is not in the hoop"

This message appears if an embroidery you are trying to Export is outside the selected hoop or larger than will fit in it. For example, with the 100mm x 100mm hoop selected, an embroidery smaller than 100mm x 100mm might be placed partially outside the work area when you Export. This message would then appear. Move the embroidery completely within the four blue corners of the work area and try again.

ST012 Error: "Embroidery is too large or is not in the hoop" when printing

This error can occur when an embroidery design(s) are partially outside of the hoop area when you try to print. Move the design(s) so that they are entirely within the hoop area; or alternatively use a larger hoop.

ST018 The embroidery I want to work with appears too small on the screen

Make sure the TruE 3 Studio window is maximized by clicking the Maximize icon on the title bar. Click Zoom To Fit to expand the hoop so it fills the work area. Also, choose a Hoop Size in Hoop Selection that is suitable to the

embroidery size.

ST019 I find it hard to select the part of the embroidery I wish to edit

Many functions of TruE 3 Studio can be used to help see sections of embroideries more easily. They include the Zoom Commands. The different methods of selection (Box Select, Freehand Select, Polygon Select and Select All) are also useful for different situations.

ST029 I have increased the Gap setting, but the lowercase characters are still touching each other

For script fonts, the Gap setting has no effect on adjacent lowercase characters. Script fonts use a special 'continuous' joining method, which places lowercase characters adjacent to each other to give the appearance of handwriting. All the fonts in the Script category use this joining method.

ST030 All the lettering appears in uppercase, even though I have typed lowercase characters in the Letters box

You are using an uppercase font. In an uppercase font (with UC in the name), all the lowercase characters are identical to the uppercase characters.

ST038 I have selected the correct hoop size, but the graphical representation does not look the same as my real hoop

This will happen if you choose a Universal Hoop that is the same size. The Universal Hoops are shown as plain hoops of the selected size. Use Hoop Selection to choose the desired hoop size, but do not choose a Universal Hoop.

ST072 I did not select all the embroideries I wanted with Box, Polygon or Freehand Select.

The embroideries must be fully enclosed by the selection line to be selected as part of a block. If even the smallest part of an embroidery is outside the line, then it will not be selected.

TC127 Clicking on the Register, Activate Dongle or Smart Update buttons have no effect

This may occur on an existing installation of the TruE 3 Embroidery System as a result of upgrading to the latest **Mac OS Update**

To resolve this issue; do the following steps:

1. Go to <http://www.trueembroidery.com>
2. Click on the **Downloads** link at the top of the page.
3. Click on the **True 3 Download Portal** button.
4. Enter your registered **E-mail Address**.
5. Enter your **Password**. Click **Next**.
6. Click **Next** again.
7. In the **TruEmbroidery 3 Software** section, download the latest **TruEmbroidery3Software32.pkg** file.
8. Close down all TruEmbroidery 3 System Apps.
9. Install the **TruEmbroidery3Software32.pkg** file that you just downloaded.
10. Open **TruE 3 Configure** and confirm that clicking on the **Register**, **Activate Dongle** and **Smart Update** buttons now open up a window in the background.

TC129 Delete My Fill: Are you sure you want to delete the selected pattern? This action cannot be undone.

This message appears when you delete a My Fill pattern from the Manage My Fills dialog. Click Yes or No, as desired.

TM001 The embroidery I want to work with appears too small on the screen.

Make sure the TruE™ 3 Modify window is maximized by choosing Window > Zoom. Click Zoom To Fit to expand the hoop so it fills the work area. Also, choose a Hoop Size in Hoop Selection that is suitable to the embroidery size.

TM002 I find it hard to select the part of the embroidery I wish to edit.

Many functions of TruE™ 3 Modify can be used to help see sections of embroideries more easily. They include the Zoom Commands, as well as the Draw Next Color Block and Draw Previous Color Block, Draw Range and Ghost Mode. The Design Player can also be used to help run through embroideries to find the required stitch or command. The different methods of selection (Box Select, Select Color, Select Stitches, Freehand Select, Polygon Select and Make Block From Visible Area) are also useful for different situations.

TM003 I selected part of an embroidery, then tried to Compensate the block. The compensation has been applied to the whole embroidery, not just the area selected.

Compensation works on the visible part of an embroidery. Hide stitches with Draw Range, Draw Next Color Block, or turn colors off by deselecting them in the Color Select area on the Modify window, to isolate a specific area before using this function.

TM004 I selected part of an embroidery, then tried to Break Up Stitches. Stitches have been broken up in the whole embroidery, not just the area selected.

Break Up Stitches works on the visible part of an embroidery. Hide stitches with Draw Range, Draw Next Color Block or turn colors off to isolate a specific area before using this function.

TM005 I cannot select the desired color using the Select Color function, because one color is on top of the other.

Use Draw Next Color and Draw Previous Color or turn colors off in the Color Select area on the Modify window to isolate the desired color area, then click Select Color to select those stitches.

TM006 Some of the stabilizing lines on my cutwork are placed in the wrong sequence.

If you use ColorSort on multiple areas of cutwork with stabilizing lines, in some circumstances the stabilizing lines may be merged. When changing the order of designs with multiple cutwork areas, use the arrows in Color select to set the order of the color blocks.

TM007 I used Box Select around an area, but selected some stitches I didn't want. Undo is dimmed so I can't click it.

To cancel a stitch block selection made using Box Select, Select Color, Freehand Select, Polygon Select or Make Block From Visible Area, click anywhere in the currently active embroidery, but outside the box showing the

selected stitches. The stitches will no longer be selected.

TruE 3 QuickFont

Listed versions: 3.0

CC001 Warning. Some TruE 3 apps still appear to be running. Do you really want to reset all modules?

This message is displayed if you select Reset All Apps in the Utilities tab while other TruEmbroidery™ 3 Software apps are running. Click Cancel, or use Quit Open TruE 3 Apps to close all open apps.

EC003 Can I have the TruE™ 3 Machine app automatically start when I turn on my computer?

Yes, you can by using the following instructions:

1. Click on **System Preferences** from your **Dock** - the icon that looks like a cog.
2. In the **System**, click on the **Users & Groups** icon.
3. Ensure that your user account (listed near the top left section of that window, under **Current User**) is selected.
4. Click on the **Login Items** tab - on the right hand pane of that window.
5. Click on the **+** icon on the right hand pane of that window. An Open dialog will appear.
6. On the left hand pane - under the **Favorites** section; click on the **Applications** entry.
7. In the right hand pane, scroll down the list of apps until you come to the **TruE™ 3 Machine** entry.
8. Select the **TruE™ 3 Machine** entry and click on the **Add** button.
9. You will now see **TruE™ 3 Machine** in the list of items that will automatically start when you log in.
10. Close **System Preferences/Users & Groups**.

When you next log into your computer; the **TruE™ 3 Machine** app will automatically run.

EC004 Can I connect more than one embroidery machine to my computer with TruE™ 3 Machine?

No, you are not able to connect two embroidery machines at the same time, and to send a design to the first embroidery machine and then to the second embroidery machine.

If you want to send an embroidery to two machines, do as follows

1. Send the design to the first machine.
2. Disconnect the USB connection between your **Mac** and that embroidery machine.
3. Connect a USB cable between your second embroidery machine and your **Mac**.
4. Send a design to that second embroidery machine.

EC005 I cannot send a design to my embroidery machine.

First, confirm that the TruE™ 3 Machine app is running. TruE™ 3 Machine appears as a machine icon in the menu bar.

If TruE™ Machine is not running, start it.

- Click the TruE™ 3 Machine icon in the Launchpad , or double-click the TruE™ 3 Machine icon in the Finder

Second, confirm that the TruE™ 3 Machine app is communicating with your embroidery machine.

- Click the machine icon in the menu bar and check that your embroidery machine is listed in the menu. If it is not, check the USB connection, then choose Quit and start TruE™ 3 Machine again.

Note: If the USB connection between your embroidery machine and computer is temporarily interrupted, you may need to restart TruE™ 3 Machine.

EC006 I have sent a design to my embroidery machine, but nothing is happening.

You can only send a design directly to your embroidery machine if the following folder exists:

/[Home]/TruEmbroidery/TempSend.

If this folder does not exist, do as follows:

1. Open a Finder window.
2. Choose **Go > Home**.
3. Click the **TruEmbroidery** folder to open it.
4. **Control-click** an empty area of the screen and choose **New Folder** from the context menu.
5. Name the new folder **TempSend**.
6. Send the design again.

Now try to send the design again.

EC008 I exported my embroidery to my USB stick, but I cannot browse to it on my embroidery machine.

Your embroidery machine may not be able to read USB sticks with a large capacity. Check the manual for your embroidery machine for information on limitations on the size of USB stick memory.

EC009 I exported my embroidery to my USB stick, but I cannot find it when I browse the stick on my embroidery machine.

You may need to place the embroidery within a particular folder on your USB stick. For example, on the Janome MC350E the embroidery files must be placed in the EMB5 folder, while for the MC11000 and MC12000 they must be placed in the Embf folder.

GE001 I cannot open Melco (.exp) files into the TruEmbroidery 3 software.

The Melco format (.exp) extension is also used by default in the Mac operating system.

Therefore, you would not be able to open those files via the Open dialog.

In order to use Melco files; use Insert/View to use those designs in your TruEmbroidery 3 software.

GE002 Some of the items in a menu are dimmed.

Certain items (for example Undo in the Edit menu) are only available once an embroidery design is shown on the screen.

GE004 I have changed the screen background color and now I wish to return to the original light blue.

Use TruE™ 3 Configure to change the grid color. Click the Color block and the Colors window appears to allow you to choose a color. The color set by default for your TruEmbroidery™ Software is 211, 233, 255 (RGB). You can use the RGB Sliders in the Colors Sliders tab to return to this color.

GE005 I can't see the toolbar or some of the icons.

Use Reset All Apps in TruE™ 3 Configure to return the toolbar and windows in the app to their default settings.

To return the icons in the toolbar to their default settings, choose View > Customize Toolbar, and drag the default icon set into the toolbar.

To use Reset All Apps:

1. Ensure your designs are saved in any TruEmbroidery™ 3 Software apps that are open.
2. Click the TruE™ 3 Configure icon in the Launchpad, or double-click the TruE™ 3 Configure icon in the Finder.
3. Click the Utilities tab.
4. Click Reset All Apps.
5. Click the Quit Open TruE 3 Apps button to close all open apps.
6. Click the Reset All Apps button.

Note: If some TruE 3 apps are still open, a message will appear, saying that some apps appear to be running. Click OK to close all running TruE 3 apps, or click Cancel.

The toolbar and windows in your app will have been restored to their original state.

Note: If preferred, to check the toolbar choose View, then choose Show Toolbar if the toolbar has been hidden, or choose Customize Toolbar to reset the toolbar if icons have been added to or removed

GE007 When I try to use the numbers box to select a thread number, the wrong thread shade is selected.

The find thread feature in Color Selection allows you to enter partial thread numbers. The first thread in the list matching the number is found, with priority given to an exact match. The existing thread number is also listed. If you are attempting to find a thread with only part of the number, the first thread matched may not be the desired thread. To ensure you select the correct thread, enter the thread number as it appears in the list. Some thread ranges have prefix characters on the thread number. These must also be entered to obtain an exact match.

GE008 A thread in an embroidery from a friend had a different name or number when I first opened it.

The thread name or number is changed when the thread is opened if the Thread Range of the selected color is not found in your thread database. This could happen if the design you are attempting to edit was supplied by someone with a later version of the thread database. The color will be replaced with the nearest match in the Import Thread Range you have set in TruE™ 3 Configure. You can alter it to any other color if desired. To check for the latest updates for the TruEmbroidery™ 3 Software, use Smart Update in TruE™ 3 Configure.

GE010 No dongle attached. Cannot open or use application (7).

This message will appear when trying to start an app if the TruEmbroidery™ 3 Software cannot detect the dongle (data protection device). Ensure the dongle is plugged into a free USB port of your computer

GE011 No dongle attached. Cannot open or use application (33).

This message may appear if you try to use TruE™ 3 Create shortly after starting or logging into your computer, before the system is fully ready. Wait for a few seconds and try again.

GE026 Not enough memory available to perform function.

This message will appear when system resources are low. Close other apps and try again. If this does not work, try restarting your computer.

GE031 Not enough memory available to perform function.

This message may appear if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE039 Information About Colors in TruEmbroidery™ 3 Software Files

The TruEmbroidery™ 3 Software will display threads in a file in the same way on any computer where it is installed. That is, the colors used will be the same even if they are reproduced slightly differently on different monitors. You can print a worksheet to see the colors and color names used in a particular design. This is true, even if you do not have all the threads in a design defined in the database on your computer. This is because a TruEmbroidery™ 3 Software design has complete information for each of the threads it uses.

Each thread used in a design will fall into one of the following categories:

- A thread from the Thread Database.
- A thread from the Thread Database that is not on your own Thread Database because your database is out of date.
- A custom thread defined in the file that does not appear in your Threads database.

The availability of threads in the Thread Database will only affect parts of the TruEmbroidery™ 3 Software where you can change colors, as follows:

- Editing apps: TruE™ 3 Studio and TruE™ 3 Modify
- Design apps: TruE™ 3 Create
- Adding/Editing Thread: TruE™ 3 Thread Cache
- Generating fonts: TruE™ 3 QuickFont

Below are some situations you may encounter according to the availability of thread definitions, as categorized above.

GE040 I have a design from another user that uses threads from the Thread Database that I do not have.

Use Smart Update to find and download the latest thread database, which you can then install.

GE047 How do I change the measurement in the TruE 3 software?

The measurements are taken from the settings on the Appearance tab in the **TruE 3 Configure**.

To change those settings, do the following:

1. Go to the **Launchpad**.
2. Open **TruE 3 Configure**.
3. Click on the **Appearance** tab.
4. From the **Show Measurements In:** section, either choose **Millimeters (mm)** or **Inches (“)**.

GE049 I cannot see all my TruE 3 icons in Launchpad.

Launchpad shows the icons for all your installed software on your **Mac®** computer.

Depending on how many apps you have installed on your **Mac®**; the icons may span more than one page in **Launchpad**.

When there is more than one page of icons available in **Launchpad**, there will be a number of ‘dots’ – representing all the available **Launchpad** pages. The dot for the current page will be highlighted, click on one of the other dots to navigate between pages.

HD001 How do I find the latest dongle drivers?

The latest dongle drivers (v7.40) can be found by opening **TruE3 Configure** and then clicking on the **Smart Update** button.

The dongle drivers allow compatibility with the latest Mac® OS X El Capitan operating system.

IN001 This package will run a program to determine if the software can be Installed.

This message appears when installing the Samples or Bonus Designs. Click Continue to proceed with the installation if the dongle has already been activated. Otherwise, activate your dongle, and then install the Samples or Bonus Designs.

IN002 Activated dongle not found: Your dongle must be Registered and Activated for TruEmbroidery™ 3 Software before installing the samples.

This message appears if you try to install the Samples or Bonus Designs before activating your dongle. Install TruEmbroidery™ 3 Software and activate your dongle before installing the Samples or Bonus Designs.

IN021 Where are my samples/backgrounds/documents/bonus designs?

When installing any of the TruEmbroidery™ 3 Software samples/backgrounds/documents/bonus designs the files should be installed in subfolders of the folder */Users/Home/TruEmbroidery3/* (where *Home* means the account of the user you are logged in as), however occasionally this may not be the case. This will result in your samples/backgrounds/documents/bonus designs being installed into the root of your hard disk, for example Macintosh HD.

If this occurs, you may either load the samples from their current location, or move/copy the folder(s) to the correct location.

Please note that by default the Mac® will replace the content inside the folder, therefore it is recommended to make a copy of your files before replacing.

IN024 "This package is incompatible with this version of macOS."

You may receive this error message when trying to install the older dongle drivers for TruE3 onto macOS Catalina.

If you receive this message, you should download and install the latest [TruE3 Dongle Drivers](#)

RE001 How do I change my personal information for my software registration?

Simply click the Register button in TruE™ 3 Configure and repeat the registration™ process. This does not change the registration status of software you have already registered, but it does allow you to change your personal information and/or dealer information.

Ensure your dongle is connected to your computer before you start, so that your current registration details can be easily retrieved.

If your dongle is not connected, you will need to enter your e-mail address and password to find your registration details.

TC127 Clicking on the Register, Activate Dongle or Smart Update buttons have no effect

This may occur on an existing installation of the TruE 3 Embroidery System as a result of upgrading to the latest **Mac OS Update**

To resolve this issue; do the following steps:

1. Go to <http://www.trueembroidery.com>
2. Click on the **Downloads** link at the top of the page.
3. Click on the **True 3 Download Portal** button.
4. Enter your registered **E-mail Address**.
5. Enter your **Password**. Click **Next**.
6. Click **Next** again.
7. In the **TruEmbroidery 3 Software** section, download the latest **TruEmbroidery3Software32.pkg** file.
8. Close down all TruEmbroidery 3 System Apps.
9. Install the **TruEmbroidery3Software32.pkg** file that you just downloaded.
10. Open **TruE 3 Configure** and confirm that clicking on the **Register**, **Activate Dongle** and **Smart Update** buttons now open up a window in the background.

TC129 Delete My Fill: Are you sure you want to delete the selected pattern? This action cannot be undone.

This message appears when you delete a My Fill pattern from the Manage My Fills dialog. Click Yes or No, as desired.

TQ001 How do I delete fonts that I have created in TruE 3 QuickFont?

This needs to be done using Finder.

1. Open **Finder**.
2. Click on the **Go** menu.
3. Hold down the **ALT/Option** button on your keyboard.
4. Click on the **Library** option that now appears in the list.
5. Browse to the **.../Application Support/VsmSoftware/TruE3/System/Fonts/My Fonts** folder.
6. Delete the font[s] that you no longer need - also be sure to delete the accompanying .png file for that font file.

TQ002 How do I create my own fonts in the *TruE 3* software?

This can be achieved using *TruE 3 QuickFont*.

Open *TruE 3 QuickFont* from the **Launchpad** or via the **Letter** tab of the *TruE 3 Studio Control Panel*.

TruE 3 Studio

Listed versions: 3.0

CC001 Warning. Some TruE 3 apps still appear to be running. Do you really want to reset all modules?

This message is displayed if you select Reset All Apps in the Utilities tab while other TruEmbroidery™ 3 Software apps are running. Click Cancel, or use Quit Open TruE 3 Apps to close all open apps.

EC003 Can I have the TruE™ 3 Machine app automatically start when I turn on my computer?

Yes, you can by using the following instructions:

1. Click on **System Preferences** from your **Dock** - the icon that looks like a cog.
2. In the **System**, click on the **Users & Groups** icon.

3. Ensure that your user account (listed near the top left section of that window, under **Current User**) is selected.
4. Click on the **Login Items** tab - on the right hand pane of that window.
5. Click on the **+** icon on the right hand pane of that window. An Open dialog will appear.
6. On the left hand pane - under the **Favorites** section; click on the **Applications** entry.
7. In the right hand pane, scroll down the list of apps until you come to the **TruE™ 3 Machine** entry.
8. Select the **TruE™ 3 Machine** entry and click on the **Add** button.
9. You will now see **TruE™ 3 Machine** in the list of items that will automatically start when you log in.
10. Close **System Preferences/Users & Groups**.

When you next log into your computer; the **TruE™ 3 Machine** app will automatically run.

EC004 Can I connect more than one embroidery machine to my computer with TruE™ 3 Machine?

No, you are not able to connect two embroidery machines at the same time, and to send a design to the first embroidery machine and then to the second embroidery machine.

If you want to send an embroidery to two machines, do as follows

1. Send the design to the first machine.
2. Disconnect the USB connection between your **Mac** and that embroidery machine.
3. Connect a USB cable between your second embroidery machine and your **Mac**.
4. Send a design to that second embroidery machine.

EC005 I cannot send a design to my embroidery machine.

First, confirm that the TruE™ 3 Machine app is running. TruE™ 3 Machine appears as a machine icon in the menu bar.

If TruE™ Machine is not running, start it.

- Click the TruE™ 3 Machine icon in the Launchpad , or double-click the TruE™ 3 Machine icon in the Finder

Second, confirm that the TruE™ 3 Machine app is communicating with your embroidery machine.

- Click the machine icon in the menu bar and check that your embroidery machine is listed in the menu. If it is not, check the USB connection, then choose Quit and start TruE™ 3 Machine again.

Note: If the USB connection between your embroidery machine and computer is temporarily interrupted, you may need to restart TruE™ 3 Machine.

EC006 I have sent a design to my embroidery machine, but nothing is happening.

You can only send a design directly to your embroidery machine if the following folder exists:

/[Home]/TruEmbroidery/TempSend.

If this folder does not exist, do as follows:

1. Open a Finder window.
2. Choose **Go > Home**.
3. Click the **TruEmbroidery** folder to open it.
4. **Control-click** an empty area of the screen and choose **New Folder** from the context menu.
5. Name the new folder **TempSend**.
6. Send the design again.

Now try to send the design again.

EC008 I exported my embroidery to my USB stick, but I cannot browse to it on my embroidery machine.

Your embroidery machine may not be able to read USB sticks with a large capacity. Check the manual for your embroidery machine for information on limitations on the size of USB stick memory.

EC009 I exported my embroidery to my USB stick, but I cannot find it when I browse the stick on my embroidery machine.

You may need to place the embroidery within a particular folder on your USB stick. For example, on the Janome MC350E the embroidery files must be placed in the EMB5 folder, while for the MC11000 and MC12000 they must be placed in the Embf folder.

GA002 Error: "Embroidery too large for output file format"

Certain formats are limited to the size of hoop used on their specific embroidery machine, for example .sew. If you attempt to save a file in this format that is bigger than the largest available hoop size this message would appear.

GA003 I have saved my embroidery as Tajima format, but it now has more colors

If your original embroidery had a stop command in it then this would be replaced by a color change, thus adding a color for every stop you have in your embroidery. As the Tajima file format does not have a stop command in its format, it requires the machine operator to manually enter stops into the machine. If you save or distribute files in Tajima format, then you must also specify all colors and stops and where they occur in the embroidery.

GA004 I have saved an embroidery in .sew format, and two files have been created

Janome software cannot load embroideries with more than 12 colors. If a file to be exported in .sew format has more than 12 color changes, it will automatically be split into multiple files, with the last character of the filename "1", "2", and so on.

GE001 I cannot open Melco (.exp) files into the TruEmbroidery 3 software.

The Melco format (.exp) extension is also used by default in the Mac operating system.

Therefore, you would not be able to open those files via the Open dialog.

In order to use Melco files; use Insert/View to use those designs in your TruEmbroidery 3 software.

GE002 Some of the items in a menu are dimmed.

Certain items (for example Undo in the Edit menu) are only available once an embroidery design is shown on the screen.

GE003 I have changed grid color and spacing and now I wish to return to the original settings."

Use TruE™ 3 Configure to change the grid color. Click the Color block and the Colors window appears to allow you to choose a color. The color set by default for your TruEmbroidery™ Software is 127, 127, 127 (RGB). You can use the RGB Sliders in the Colors Sliders tab to return to this color.

Use Preferences to change the grid spacing. Set the Grid Size to 10mm.

GE004 I have changed the screen background color and now I wish to return to the original light blue.

Use TruE™ 3 Configure to change the grid color. Click the Color block and the Colors window appears to allow you to choose a color. The color set by default for your TruEmbroidery™ Software is 211, 233, 255 (RGB). You can use the RGB Sliders in the Colors Sliders tab to return to this color.

GE005 I can't see the toolbar or some of the icons.

Use Reset All Apps in TruE™ 3 Configure to return the toolbar and windows in the app to their default settings.

To return the icons in the toolbar to their default settings, choose View > Customize Toolbar, and drag the default icon set into the toolbar.

To use Reset All Apps:

1. Ensure your designs are saved in any TruEmbroidery™ 3 Software apps that are open.
2. Click the TruE™ 3 Configure icon in the Launchpad, or double-click the TruE™ 3 Configure icon in the Finder.
3. Click the Utilities tab.
4. Click Reset All Apps.
5. Click the Quit Open TruE 3 Apps button to close all open apps.
6. Click the Reset All Apps button.

Note: If some TruE 3 apps are still open, a message will appear, saying that some apps appear to be running. Click OK to close all running TruE 3 apps, or click Cancel.

The toolbar and windows in your app will have been restored to their original state.

Note: If preferred, to check the toolbar choose View, then choose Show Toolbar if the toolbar has been hidden, or choose Customize Toolbar to reset the toolbar if icons have been added to or removed

GE007 When I try to use the numbers box to select a thread number, the wrong thread shade is selected.

The find thread feature in Color Selection allows you to enter partial thread numbers. The first thread in the list matching the number is found, with priority given to an exact match. The existing thread number is also listed. If you are attempting to find a thread with only part of the number, the first thread matched may not be the desired thread. To ensure you select the correct thread, enter the thread number as it appears in the list. Some thread ranges have prefix characters on the thread number. These must also be entered to obtain an exact match.

GE008 A thread in an embroidery from a friend had a different name or number when I first opened it.

The thread name or number is changed when the thread is opened if the Thread Range of the selected color is not found in your thread database. This could happen if the design you are attempting to edit was supplied by someone with a later version of the thread database. The color will be replaced with the nearest match in the Import Thread Range you have set in TruE™ 3 Configure. You can alter it to any other color if desired. To check for the latest updates for the TruEmbroidery™ 3 Software, use Smart Update in TruE™ 3 Configure.

GE009 When I open a picture the name is displayed, but I cannot see the picture and Continue is dimmed.

This can happen if the desired picture is corrupt. For example, it might have an extension such as .bmp or .jpg, yet not be a proper picture file.

GE010 No dongle attached. Cannot open or use application (7).

This message will appear when trying to start an app if the TruEmbroidery™ 3 Software cannot detect the dongle (data protection device). Ensure the dongle is plugged into a free USB port of your computer

GE011 No dongle attached. Cannot open or use application (33).

This message may appear if you try to use TruE™ 3 Create shortly after starting or logging into your computer, before the system is fully ready. Wait for a few seconds and try again.

GE012 The file XX is locked. If you want to make changes to this document, click Unlock. To keep the file unchanged and work with a copy, click Duplicate.

This message appears when trying to edit an embroidery design outline which is locked, or is on a read-only medium such as a CD-R. Unlock the embroidery design outline before editing, or duplicate it and then edit it, if it is on a read-only medium.

GE013 The file XX is on a read-only volume and cannot be unlocked. You can duplicate this document and edit the duplicate.

This message appears when trying to unlock an embroidery design outline which is on a read-only medium such as a CD-R. Duplicate it, then edit and save it.

GE014 The file doesn't exist.

This message appears if the desired design is not where the app expects it to be, for example if a design was saved to a network drive, then deleted or renamed.

The message would appear if you tried to load the design from the Open Recent list on the File menu.

GE015 Unrecognized file format.

This message appears if the design you are attempting to load is corrupt. For example, it might have the extension .edo, yet not be a proper design outline file.

GE016 Unrecognized file extension.

This message may appear if the design you are attempting to load is corrupt. For example, it might have the extension .edo, yet not be a proper design outline file.

GE017 Background Image Warning. This will remove your existing image, continue?

This message appears if you try to load a background image when an image has already been loaded. Click OK to load a new image, or Cancel to use your existing image.

GE018 Background Image Error. Could not open the background image.

This message appears if you try to load a background image and the picture is corrupt. For example, it might have an extension such as .bmp or .jpg, yet not be a proper picture file.

GE019 The document XX could not be saved as XX. The volume is read only. Try saving the file to another volume.

This message appears if, for instance, you try to save an embroidery design to a CD-R. A CD-R is read only, therefore you will not be able to save the embroidery design. Save the embroidery design to another medium .

GE020 The document XX could not be autosaved. The volume is read only. Try saving the file to another volume. You can also duplicate the document or discard your changes to close it.

This message appears if, for instance, you have loaded an embroidery design from a CD-R and then attempt to save the embroidery design back to the CD. A CD-R is read only, therefore you will not be able to save the embroidery design. Save the embroidery design to another medium .

GE021 The file already exists. Do you want to replace it?

This message appears if an embroidery you are trying to Save has a name that has already been used. Replace the existing embroidery, or choose a new name before saving.

GE022 Embroidery is too large or will not fit in hoop.

This message appears if an embroidery you are trying to Export is outside the selected hoop or larger than will fit in it. For example, with the 100mm x 100mm hoop selected, an embroidery smaller than 100mm x 100mm might be placed partially outside the work area when you choose Export. This message would then appear. Move the embroidery completely within the four blue corners of the work area and try again. Alternatively, change the size of the hoop.

GE023 The file already exists. Do you want to replace it?

This message appears if an embroidery you are trying to Export has a name that has already been used. Replace the existing embroidery, or choose a new name before exporting.

GE024 ExportDesign too large for export format. Exporting XX file failed.

Certain formats are limited to the number of stitches they can save or the size of hoop used on their specific embroidery machine, for example the .sew or Pfaff (.pcs) file format. If you attempt to save a file in this format that is bigger than the largest available hoop size, or has more stitches than are allowed, this message will appear.

GE025 Print. Embroidery is too large or will not fit in hoop.

This message appears if the embroidery on screen is partially outside the selected hoop. Move the embroidery completely within the four blue corners of the work area and try again, or change the hoop size

GE026 Not enough memory available to perform function.

This message will appear when system resources are low. Close other apps and try again. If this does not work, try restarting your computer.

GE027 Not For Sale. This is a Dealer version of the TruEmbroidery™ 3 Software and not for retail sale. If you are not a certified registered TruEmbroidery™ 3 Software dealer you are not entitled to use this software. Please contact your local dealer for further information.

This message means that the app is a dealer only version for demonstration and training purposes, and is not available for retail sale. Please contact software support for further information.

GE028 Could not understand the string XX.

This message appears if the value entered in a number box is outside the valid range, or is not a number.

GE029 The file doesn't exist.

This message appears if the desired embroidery is not where the app expects it to be, for example if an embroidery was saved to a network drive, then deleted or renamed. The message would appear if you tried to load the embroidery from the Open Recent list on the File menu.

GE030 Unrecognized file format.

This message appears if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE031 Not enough memory available to perform function.

This message may appear if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE032 Cannot open stitch file.

This message may appear if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE033 Unrecognized file extension.

This message may appear if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE034 Stitch file is corrupt.

The embroidery is corrupt and cannot be loaded. Refer to source of this file for a solution.

GE035 Stitch file XY coordinates incorrect.

The embroidery is corrupt and cannot be loaded. Refer to source of this file for a solution.

GE036 The document "xx" could not be opened.

This message appears if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE037 The file "xx" is locked. If you want to make changes to this document, click **Unlock**. To keep the file unchanged and work with a copy, click **Duplicate**

This message appears when trying to edit an embroidery which is locked, or is on a read-only medium such as a CD-R. Unlock the embroidery before editing, or duplicate it, and then edit it, if it is on a read-only medium

GE038 The file "xx" is on a read-only volume and cannot be unlocked. You can duplicate this document and edit the duplicate.

This message appears when trying to unlock an embroidery which is on a readonly medium such as a CD-R. Duplicate it, then edit and save it.

GE039 Information About Colors in TruEmbroidery™ 3 Software Files

The TruEmbroidery™ 3 Software will display threads in a file in the same way on any computer where it is installed. That is, the colors used will be the same even if they are reproduced slightly differently on different monitors. You can print a worksheet to see the colors and color names used in a particular design. This is true, even if you do not have all the threads in a design defined in the database on your computer. This is because a TruEmbroidery™ 3 Software design has complete information for each of the threads it uses.

Each thread used in a design will fall into one of the following categories:

- A thread from the Thread Database.
- A thread from the Thread Database that is not on your own Thread Database because your database is out of date.
- A custom thread defined in the file that does not appear in your Threads database.

The availability of threads in the Thread Database will only affect parts of the TruEmbroidery™ 3 Software where you can change colors, as follows:

- Editing apps: TruE™ 3 Studio and TruE™ 3 Modify
- Design apps: TruE™ 3 Create
- Adding/Editing Thread: TruE™ 3 Thread Cache
- Generating fonts: TruE™ 3 QuickFont

Below are some situations you may encounter according to the availability of thread definitions, as categorized above.

GE040 I have a design from another user that uses threads from the Thread Database that I do not have.

Use Smart Update to find and download the latest thread database, which you can then install.

GE042 Do you want to remove all points from your demo? This cannot be undone.

This message appears if you use Reset My Demo in Life View. Click Yes to continue, or No to keep your existing My Demo.

GE043 How do I backup a My Demo animation?

The **My Demo** animated preview is stored in the **AnimationPath.txt** file in the folder **/User]/Library/ApplicationSupport/VSMSSoftware/TruE3/System**. This location may not be visible on your Mac®, but you can find it using the following steps.

To Backup a My Demo Animation

1. Open the **Finder** window.
2. Open the **Go** menu.
3. Hold down the **Option (Alt)** key, and choose **Library**.
4. Browse to **/ApplicationSupport/VSMSSoftware/TruE3/System**.
5. Copy the file **AnimationPath.txt** to your backup location.

GE044 Where are my recent pictures?

I recently captured an image using a camera in a **TruE 3 Assistant**.

Images that have recently been captured using your webcam in one of our TruE 3 Assistants can be found in **/User]/Library/Containers/com.apple.ImageKit.RecentPictureService/Data/Library/Images/Recent Pictures**.

This location may not be visible on your Mac®, but you can find it using the following steps.

To Manage Recent Pictures Taken By Your Webcam

1. Open the **Finder** window.
2. Open the **Go** menu.
3. Hold down the **Option (Alt)** key, and choose Library.
4. Browse to
/User]/Library/Containers/com.apple.ImageKit.RecentPictureService/Data/Library/Images/Recent Pictures.
5. Open the **View** menu in **Finder**.
6. Click on the **as Icons** option to have a better view of the individual images.
7. Manage the .png or .tiff files in that folder as needed.

GE045 Exporting SHV designs to my USB Embroidery Stick seems slow.

The process of exporting SHV designs to a USB Embroidery stick may take up to a few minutes.

When the 'Exporting to USB Stick' progress bar disappears; then the designs have written to the USB Embroidery Stick.

Be sure to go to **Finder** and *Eject* your USB Stick before removing it from the computer and inserting it into your Designer 1 USB machine.

GE046 When I export SHV files to my USB Embroidery Stick, it does not appear to have written the designs to the USB Stick.

It may be that your USB Embroidery Stick is running very low on space.

It is advisable to format your USB Embroidery Stick to ensure that it has enough space for your SHV designs to be written.

*The following formatting process will delete **ALL** files/folders from your **USB Embroidery Stick**. If you have any files/folders that you wanted to keep, then backup them up before proceeding with the following procedure.*

1. Eject and then remove all USB Sticks/Hard Disk from your Mac®.
2. Insert your **USB Embroidery Stick** that you would like to format.
3. Open **Finder**.
4. Click on the **Go** menu.
5. Click on the **Home** option.
6. Browse to the **.../TruEmbroidery3/Samples/Finder/Stitch/Animals**
7. **Control+click** on any .vp3 file shown. A context menu will appear.
8. Move your mouse to the **Services** sub-menu
9. Click on the **TruE 3 Convert** option. A **TruE 3 Convert** box should appear.
10. Click on the ... button in the **Output File Type** section.
11. Select **Husqvarna Viking Designer 1 (.shv)** from the list.
12. Click on the **USB Stick** icon in the **Select Device** section
13. Click on the **Format** button in that section. A warning will appear.
14. After you have read and accepted the warning, click **Yes** to start the Formatting process.
15. The formatting process should take less than a minute.
16. When it is complete, try to export your SHV designs again to the USB Embroidery Stick.

GE047 How do I change the measurement in the TruE 3 software?

The measurements are taken from the settings on the Appearance tab in the **TruE 3 Configure**.

To change those settings, do the following:

1. Go to the **Launchpad**.
2. Open **TruE 3 Configure**.
3. Click on the **Appearance** tab.
4. From the **Show Measurements In:** section, either choose **Millimeters (mm)** or **Inches (")**.

GE048 I have a Husqvarna Viking Designer I machine; how do I create a SHV design?

You would need to choose **Husqvarna Viking Designer I** from the **Export** dialog:

1. Click on the **File** menu
2. Choose **Export**.
3. Select **Husqvarna Viking Designer I (.shv)** from the drop-down list.
4. Depending on which device (**floppy disk** or **USB Embroidery Stick**) you are write to, you will click on the appropriate icon for that device.
5. **[Optional] to backup the items already on your floppy disk/USB Embroidery Stick; click on the Read Stick or Disk button and then choose the location to save your backup to.**
6. Click on the **Next** button to start writing to that device.

n.b. The instructions above are only applicable to **TruE 3 Elite** or **TruE 3 Elements** owners with activated dongles.

GE049 I cannot see all my TruE 3 icons in Launchpad.

Launchpad shows the icons for all your installed software on your **Mac®** computer.

Depending on how many apps you have installed on your **Mac®**; the icons may span more than one page in **Launchpad** .

When there is more than one page of icons available in **Launchpad** , there will be a number of 'dots' – representing all the available **Launchpad** pages. The dot for the current page will be highlighted, click on one of the other [dots] to navigate between pages.

HD001 How do I find the latest dongle drivers?

The latest dongle drivers (v7.40) can be found by opening **TruE3 Configure** and then clicking on the **Smart Update** button.

The dongle drivers allow compatibility with the latest Mac® OS X El Capitan operating system.

IN001 This package will run a program to determine if the software can be Installed.

This message appears when installing the Samples or Bonus Designs. Click Continue to proceed with the installation if the dongle has already been activated. Otherwise, activate your dongle, and then install the Samples or Bonus Designs.

IN002 Activated dongle not found: Your dongle must be Registered and Activated for TruEmbroidery™ 3 Software before installing the samples.

This message appears if you try to install the Samples or Bonus Designs before activating your dongle. Install TruEmbroidery™ 3 Software and activate your dongle before installing the Samples or Bonus Designs.

IN021 Where are my samples/backgrounds/documents/bonus designs?

When installing any of the TruEmbroidery™ 3 Software samples/backgrounds/documents/bonus designs the files should be installed in subfolders of the folder `/Users/Home/TruEmbroidery3/` (where *Home* means the account of the user you are logged in as), however occasionally this may not be the case. This will result in your samples/backgrounds/documents/bonus designs being installed into the root of your hard disk, for example Macintosh HD.

If this occurs, you may either load the samples from their current location, or move/copy the folder(s) to the correct location.

Please note that by default the Mac® will replace the content inside the folder, therefore it is recommended to make a copy of your files before replacing.

IN022 Backgrounds / Bonus Design installs: "The installation failed. The installer encountered an error..."

When installing the **Backgrounds** or **Bonus Designs** installs, you may receive the "The installation failed. The installer encountered an error..." message.

This is because your **TruEmbroidery3/Samples** folder can only be read - it is not possible to create files or folders within the **Samples** folder.

To resolve this issue download and install all the available **Smart Update** files:

1. Open **TruE 3 Configure**.
2. Click on the **Smart Update** button.
3. Follow the on-screen instructions to download and install all the available updates.

IN023 Since upgrading to MacOS Catalina, my work area does not appear when I open some TruE3 modules

When opening **TruE3 Studio** or **TruE3 Create**, the module opens (and shows the menus), but the work area does not appear.

[These instructions are not required on any Mac operating system version earlier than MacOS Catalina (10.15)]

You will need to:

- Download the [MacOS Catalina - TruE3 Patch](#)
- Follow the instructions in the following video to resolve the issue - [MacOS Catalina TruE3 patch video](#)

If your installed TruE3 Software is not at version 3.2; you can download the latest [TruE3 Software 3.2](#) from here and then install it.

Depending on the setup of your computer/device, the video may view in your browser, or download the file. If the file is downloaded, you will be required to find and open the downloaded video file.

IN024 "This package is incompatible with this version of macOS."

You may receive this error message when trying to install the older dongle drivers for TruE3 onto macOS Catalina.

If you receive this message, you should download and install the latest [TruE3 Dongle Drivers](#)

RE001 How do I change my personal information for my software registration?

Simply click the Register button in TruE™ 3 Configure and repeat the registration process. This does not change the registration status of software you have already registered, but it does allow you to change your personal information and/or dealer information.

Ensure your dongle is connected to your computer before you start, so that your current registration details can be easily retrieved.

If your dongle is not connected, you will need to enter your e-mail address and password to find your registration details.

ST004 ColorSort does not work for the multi-color monogram that I created

When creating multi-color lettering, ensure that the Trim Connection is selected. If Running Connection is selected, you will not be able to ColorSort the lettering.

ST006 When I ColorSort an embroidery the number of color blocks produced varies

The ColorSort process does not just put the same color blocks together. It checks for overlap between areas, therefore depending on the overlaps, the final number of color blocks may vary, even if you are Combining a similar number of SuperDesigns or monograms.

ST011 Error: "Embroidery is too large or is not in the hoop"

This message appears if an embroidery you are trying to Export is outside the selected hoop or larger than will fit in it. For example, with the 100mm x 100mm hoop selected, an embroidery smaller than 100mm x 100mm might be placed partially outside the work area when you Export. This message would then appear. Move the embroidery completely within the four blue corners of the work area and try again.

ST012 Error: "Embroidery is too large or is not in the hoop" when printing

This error can occur when an embroidery design(s) are partially outside of the hoop area when you try to print. Move the design(s) so that they are entirely within the hoop area; or alternatively use a larger hoop.

ST018 The embroidery I want to work with appears too small on the screen

Make sure the TruE 3 Studio window is maximized by clicking the Maximize icon on the title bar. Click Zoom To Fit to expand the hoop so it fills the work area. Also, choose a Hoop Size in Hoop Selection that is suitable to the embroidery size.

ST019 I find it hard to select the part of the embroidery I wish to edit

Many functions of TruE 3 Studio can be used to help see sections of embroideries more easily. They include the Zoom Commands. The different methods of selection (Box Select, Freehand Select, Polygon Select and Select All) are also useful for different situations.

ST029 I have increased the Gap setting, but the lowercase characters are still touching each other

For script fonts, the Gap setting has no effect on adjacent lowercase characters. Script fonts use a special 'continuous' joining method, which places lowercase characters adjacent to each other to give the appearance of handwriting. All the fonts in the Script category use this joining method.

ST030 All the lettering appears in uppercase, even though I have typed lowercase characters in the Letters box

You are using an uppercase font. In an uppercase font (with UC in the name), all the lowercase characters are identical to the uppercase characters.

ST038 I have selected the correct hoop size, but the graphical representation does not look the same as my real hoop

This will happen if you choose a Universal Hoop that is the same size. The Universal Hoops are shown as plain hoops of the selected size. Use Hoop Selection to choose the desired hoop size, but do not choose a Universal

Hoop.

ST043 The Mirror option does not seem to have any effect in the Encore function.

If your embroidery is horizontally symmetrical before you use the Encore function, the Mirror option will have no apparent effect. However, it will affect stitch order of each alternate copy. For example, clockwise stitching will become counter-clockwise, and so on.

ST044 The value '*mm' needs to be in the range 3 to 200 mm. Please provide a valid value.

This message appears if the size entered in the Size Box on the Letter window of the Control Panel, or in the Letter Properties dialog is below 3mm or above 200mm, or is not a number. The Size setting refers to the height in millimeters of an uppercase 'A' in the selected font. If you wish to increase lettering above this you could click and drag one of the corner boxes or alter the Height or Width proportions.

ST045 The value '*mm' needs to be in the range 1 to 5 mm. Please provide a valid value.

This message appears if the size entered in the Line Spacing box in the Letter Letter Options or Letter Properties dialog is below 1mm or above 5mm, or is not a number.

ST046 The value '' is invalid. Please provide a valid value.**

This message appears if the value entered in the height or width box in the Letter Options or Letter Properties dialog is not a number.

ST047 The value '' is invalid. Please provide a valid value.**

This message appears if the value entered in the height or width box on the SuperDesign window of the Control Panel, or in the SuperDesign Properties dialog, is not a number.

ST048 The value '*mm' needs to be in the range 5 to 200 mm. Please provide a valid value."

This message appears if the size entered in the Size Box on the SuperDesign window of the Control Panel, or in the SuperDesign Properties dialog, is below 5mm or above 200mm, or is not a number. The Size setting refers to the height in millimeters of the selected SuperDesign. If you wish to increase the size above this you could click and drag one of the corner boxes or alter the Height or Width proportions.

ST049 The value * is too small. Please provide a valid value.

This message appears if the value entered in the height or width box on the SuperDesign window of the Control Panel, or in the SuperDesign Properties dialog, is smaller than 25%.

ST050 The value * is too large. Please provide a valid value.

This message appears if the value entered in the height or width box on the SuperDesign window of the Control Panel, or in the SuperDesign Properties dialog, is greater than 400%.

ST051 The value '*' is invalid. Please provide a valid value.

This message appears if the value entered in the height or width box in the Frame Options or Frame Properties dialog is not a number.

ST052 The value '*mm' needs to be in the range 5 to 200 mm. Please provide a valid value.

This message appears if the size entered in the Size Box in the Frame Options or Frame Properties dialog is below 5mm or above 200mm, or is not a number. The Size setting refers to the height in millimeters of the selected Frame. If you wish to increase the size above this you could click and drag one of the corner boxes or alter the Height or Width proportions.

ST053 The value '*mm' needs to be in the range -50 to 50 mm. Please provide a valid value

This message appears if the size entered in the Margin box on the Frame window of the Control Panel is below -50mm or above 50mm.

ST054 The value * is too small. Please provide a valid value.

This message appears if the value entered in the height or width box in the Frame Options or Frame Properties dialog is smaller than 25%.

ST055 The value * is too large. Please provide a valid value.

This message appears if the value entered in the height or width box in the Frame Options or Frame Properties dialog is greater than 400%.

ST056 The value '*mm' needs to be in the range -50 to 50 mm. Please provide a valid value."

This message appears if the size entered in the Margin box on the Border window of the Control Panel is below -50mm or above 50mm.

ST067 The selected dimensions will produce a large PortraitStitch and stitch creation may take some time. Transparent background areas will reduce the time required.

This message will appear if you specify a PortraitStitch larger than 26000mm square. Click OK to continue creating the Portrait. To reduce the stitch creation time, use a picture editor such as Preview to remove the picture background, particularly any very detailed areas.

ST068 I find it hard to select the embroidery I wish to edit.

Many functions of TruE™ 3 Studio can be used to help see embroideries more easily. They include the Zoom Commands and the different methods of selection (Box Select, Freehand Select and Polygon Select. Use Command and the left or right arrow (⌘← or ⌘→) to select each embroidery in turn.

ST069 Certain functions don't seem to work all the time.

Some functions, such as the Design Player and alignment tools, are only available when one or more embroideries are selected. To use these functions, select one or more embroideries first.

ST070 I've selected the wrong embroidery to move or manipulate.

To deselect an embroidery, click the mouse outside the embroidery, or on another embroidery. To select the desired embroidery, click on it and an outline box will appear. If one embroidery or piece of lettering is overlapping another making it difficult to select, use Command and the left or right arrow (⌘← or ⌘→) to select each embroidery in turn.

ST071 The Color Select area on the Design window appears blank.

If no design is selected, or more than one design is selected, the Color Select area on the Design window will be blank. To change the threads in an embroidery, select the single embroidery, then view the threads in the Color Select area.

ST072 I did not select all the embroideries I wanted with Box, Polygon or Freehand Select.

The embroideries must be fully enclosed by the selection line to be selected as part of a block. If even the smallest part of an embroidery is outside the line, then it will not be selected.

ST073 I want to change the design that has been used in the corners in Encore.

In Encore Shape and Encore Hoop, when two embroideries are selected, the embroidery that is first in the stitchout order will be placed in the corners. If you want to use the other embroidery in the corners, use Layout Order to change the order.

ST074 Not all of my designs have been used in the Encore function.

A maximum of two designs can be used with Encore Shape and Encore Hoop. If more than two designs are selected, only the first two that were loaded will be used in the Encore. Either use Encore Circle or Line, or combine some of the embroideries before using Encore.

ST075 I cannot use some other functions when previewing Encored designs.

While in Preview mode it is not possible to select any other tab on the control panel, or many other functions. If you use the design viewer, the Encore will be cancelled.

ST076 I don't remember which font I used when making an embroidery.

Information on the font, SuperDesign, Frame or Border used in an embroidery made in TruE™ Studio is stored in the Settings. Open the embroidery, then click the Settings tab and Edit in the Design window to view the full text of the settings. Alternatively, print a worksheet for the embroidery.

ST077 I want to change the size of the lettering, but the control boxes have no effect.

For the following Line Types, there are no control boxes to change the size of the characters in the lettering:

- Circle Clockwise
- Circle Clockwise
- Full Circle
- Fit To Straight Line

- Fit To Wavy Line

Instead, use Size, Height and Width in Letter Properties to change the size of the characters.

ST078 I want to change the appearance of the font stitching, but the Stitch Type drop-down is not available.

Some fonts have non-editable properties. For example, they may use more than one pattern for satin or fill, or use the same fill pattern at different angles in different characters. Therefore, there is no overall uniform property that can be changed, so the properties dialog box may not be used to change the stitch Properties. You may wish to use a different font with a similar style that allows you to change its properties.

ST079 When I try to change the stitch properties the Stitch Type drop-down is dimmed (unavailable).

You are trying to change a property in a font that is not editable. For instance, if a font uses more than one type of Pattern Fill, the stitch type will be unavailable. Also, if a font is an outline font of running, double or triple stitch, no fill or satin properties will be available.

ST080 All the lettering appears in lowercase, even though I have typed uppercase characters in the Letters box.

You are using an lowercase font. In a lowercase font (with LC in the name), all the uppercase characters are identical to the lowercase characters.

ST081 I have placed multiple pieces of lettering with different text in each item and I want to change the text that appears in some of them. However, the text in the Letters box stays the same when I select earlier pieces of lettering.

Select the desired lettering, then Control-click the lettering and choose Properties. The Letter Properties appears and you may change the text.

Note: Once lettering has been converted to embroidery when it is Saved or Combined, no adjustments can be made with Letter Properties.

ST083 I want to rotate and mirror my lettering, SuperDesign or frame, but once I do this I can no longer change its properties.

When lettering, SuperDesigns and frames are rotated or mirrored, they are 'fixed' as embroideries. Make any changes to the properties of your lettering, SuperDesign or frame before rotating or mirroring it.

ST084 I copied my lettering, SuperDesign or frame, but I could not edit the properties of the copy.

When lettering, SuperDesigns and frames are copied, the copy is 'fixed' as an embroidery. If you want to change the properties of both copies, create the second copy in the Letter, SuperDesign or Frame window.

ST085 I have ColorSorted my lettering and now I can no longer change its properties.

When lettering is ColorSorted it is 'fixed' as an embroidery. Make any desired adjustments to your lettering before using ColorSort.

ST086 I have adjusted my lettering on the work area, but when I change the Letter Properties, the lettering changes shape a little.

The control boxes on blocks of lettering allow subtle adjustments directly to the shape of the lettering. However, the Letter Properties only allows the proportions of Height and Width to be adjusted. When the Letter Properties are changed, the previous adjustments may be partially lost when the Height and Width values are applied. Therefore, it is recommended to make all desired adjustments in Letter Properties before making final adjustments directly with the control boxes.

ST087 In Letter Options I tried to edit the Stitch Type for my lettering, but the drop-down menu was dimmed.

If a font does not use an editable stitch type, the Stitch Type will not be available in Letter Options

ST088 In Letter Properties I tried to edit the Stitch Type for my lettering, but there was no drop-down menu.

Stitch types are not available in the Letter Properties dialog box. Control-click the lettering, and select the stitch type from the context menu.

ST089 I used Control-click to open the context menu for my lettering, but I could not choose the stitch type.

If a font does not use an editable stitch type, no stitch type will be available in the context menu.

ST090 I changed a color in my embroidery, but do not like the new color. Undo is dimmed on the Edit menu so I can't choose it.

To cancel some actions, click outside the currently active embroidery. Then choose Undo. Alternatively, Control-click the embroidery and choose Undo from the context menu.

ST091 When I ColorSort an embroidery the number of color blocks produced varies.

The ColorSort process does not just put the same color blocks together. It checks for overlap between areas. Therefore depending on the overlaps, the final number of color blocks may vary, even if you have Combined exactly the same embroideries, lettering or SuperDesigns.

ST092 I have used a motif as an envelope border and the results are unexpected.

If the selected motif width is larger than the size of the monogram or name, then only one motif may be created. Adjusting lettering or motif size or spacing may allow multiple motifs to be included in the border. If the selected motif shape is irregular it may overlap the monogram. Adjusting lettering or motif size or spacing may produce the desired results.

ST093 How can I tell if an embroidery is already endless?

The Notes for an embroidery will have the word Endless added after any other Notes text. If the Notes have been edited so that this is no longer the case, use the slider bars on the Modify window to see if there are marker stitches at the beginning and end of the embroidery.

ST094 I have loaded an embroidery that I made Endless some time ago. How do I know what Fabric Direction was used when I made it endless?

Use the slider bars on the Modify window to find the locations of the start and end marker stitches. For example, if the start markers are at the top and the end markers are at the bottom, the original Fabric Direction was Up.

ST095 I forgot to set a Gap, but it does not appear to have worked when I tried to make the embroidery Endless again.

This can happen if you use the Repeat Embroidery option and you do not use Undo before trying again. This is because you have already created a repeated sequence with no gaps that then becomes a single embroidery. If you then use the Endless Assistant again to try to add a Gap, the whole repeated sequence is treated as a single embroidery. This should be apparent if you look at the Notes, because the word 'Endless' will occur twice at the end of the Notes. Always use Undo to go back to the single copy of the embroidery before trying the Endless Assistant again with different settings.

ST096 The Endless Assistant does not work.

The Endless Assistant is not available in any of the following situations:

- There is no embroidery loaded, so there is nothing that can be made endless: load an embroidery
- The embroidery is too big for or is outside the current hoop: adjust the embroidery as needed or choose a larger hoop

TC127 Clicking on the Register, Activate Dongle or Smart Update buttons have no effect

This may occur on an existing installation of the TruE 3 Embroidery System as a result of upgrading to the latest **Mac OS Update**

To resolve this issue; do the following steps:

1. Go to <http://www.truembroidery.com>
2. Click on the **Downloads** link at the top of the page.
3. Click on the **True 3 Download Portal** button.
4. Enter your registered **E-mail Address**.
5. Enter your **Password**. Click **Next**.
6. Click **Next** again.
7. In the **TruEmbroidery 3 Software** section, download the latest **TruEmbroidery3Software32.pkg** file.
8. Close down all TruEmbroidery 3 System Apps.
9. Install the **TruEmbroidery3Software32.pkg** file that you just downloaded.
10. Open **TruE 3 Configure** and confirm that clicking on the **Register**, **Activate Dongle** and **Smart Update** buttons now open up a window in the background.

TC129 Delete My Fill: Are you sure you want to delete the selected pattern? This action cannot be undone.

This message appears when you delete a My Fill pattern from the Manage My Fills dialog. Click Yes or No, as desired.

TC132 I would like to get rid of the lines created from the white background of my picture by Linear PhotoStitch embroidery.

After creating and saving an embroidery, use the Edit tab or open the file in TruE™ 3 Modify and use the following instructions.

1. Use the Freehand Block Select feature to mark the stitches in the background.

2. Click Delete Stitches.
3. Save the adjusted embroidery

TQ001 How do I delete fonts that I have created in TruE 3 QuickFont?

This needs to be done using Finder.

1. Open **Finder**.
2. Click on the **Go** menu.
3. Hold down the **ALT/Option** button on your keyboard.
4. Click on the **Library** option that now appears in the list.
5. Browse to the **.../Application Support/VsmSoftware/TruE3/System/Fonts/My Fonts** folder.
6. Delete the font[s] that you no longer need - also be sure to delete the accompanying .png file for that font file.

TQ002 How do I create my own fonts in the *TruE 3* software?

This can be achieved using *TruE 3 QuickFont*.

Open *TruE 3 QuickFont* from the **Launchpad** or via the **Letter** tab of the *TruE 3 Studio Control Panel*.

TruE 3 Thread Cache

Listed versions: 3.0

CA001 This action is permanent and may not be reversed. Do you wish to continue?

This message appears if you try to delete a thread definition from a My Thread database, or to delete a My Thread database. If you wish to go ahead and delete the thread, click Yes. Otherwise click No.

CA002 The thread XX already exists in the selected Thread Database. Do you want to overwrite it?

This message appears if you try to use an existing thread name in a My Thread database. If you wish to overwrite, click Yes. Otherwise click No.

CA003 Failed to connect to the Cloud: The e-mail address has been recognized but the password is incorrect

No connection can be made with the software registration database. A correct email address has been used with an incorrect password. Check the e-mail address and password, and try again.

CA004 Failed to connect to the Cloud: An error has occurred. Please try again.

No connection can be made with the software registration database. An unknown e-mail address was used. Check the e-mail address and password, and try again.

CA005 Failed to connect to the Cloud: The e-mail address is incorrectly formatted.

No connection can be made with the software registration database. The e-mail used is not a valid e-mail address. Check the e-mail address and password, and try again.

CA006 I receive a warning message when I click the Upload button in TruE 3 Thread Cache

By clicking on the Upload button, you may receive the following message:

"TruE 3 Thread Cache wants to use your confidential information stored in "threads.truembroidery.com" in your keychain.

The authenticity of "TruE 3 Thread Cache" cannot be verified. Do you want to allow access to this item?"

This message generated by the Mac® operating system; is appearing because you will be prompted to enter your E-mail address/Password details that you use to connect to the Registration Database.

CC001 Warning. Some TruE 3 apps still appear to be running. Do you really want to reset all modules?

This message is displayed if you select Reset All Apps in the Utilities tab while other TruEmbroidery™ 3 Software apps are running. Click Cancel, or use Quit Open TruE 3 Apps to close

all open apps.

EC003 Can I have the TruE™ 3 Machine app automatically start when I turn on my computer?

Yes, you can by using the following instructions:

1. Click on **System Preferences** from your **Dock** - the icon that looks like a cog.
2. In the **System**, click on the **Users & Groups** icon.
3. Ensure that your user account (listed near the top left section of that window, under **Current User**) is selected.
4. Click on the **Login Items** tab - on the right hand pane of that window.
5. Click on the **+** icon on the right hand pane of that window. An Open dialog will appear.
6. On the left hand pane - under the **Favorites** section; click on the **Applications** entry.
7. In the right hand pane, scroll down the list of apps until you come to the **TruE™ 3 Machine** entry.
8. Select the **TruE™ 3 Machine** entry and click on the **Add** button.
9. You will now see **TruE™ 3 Machine** in the list of items that will automatically start when you log in.
10. Close **System Preferences/Users & Groups**.

When you next log into your computer; the **TruE™ 3 Machine** app will automatically run.

EC004 Can I connect more than one embroidery machine to my computer with TruE™ 3 Machine?

No, you are not able to connect two embroidery machines at the same time, and to send a design to the first embroidery machine and then to the second embroidery machine.

If you want to send an embroidery to two machines, do as follows

1. Send the design to the first machine.
2. Disconnect the USB connection between your **Mac** and that embroidery machine.
3. Connect a USB cable between your second embroidery machine and your **Mac**.
4. Send a design to that second embroidery machine.

EC005 I cannot send a design to my embroidery machine.

First, confirm that the TruE™ 3 Machine app is running. TruE™ 3 Machine appears as a machine icon in the menu bar.

If TruE™ Machine is not running, start it.

- Click the TruE™ 3 Machine icon in the Launchpad , or double-click the TruE™ 3 Machine icon in the Finder .

Second, confirm that the TruE™ 3 Machine app is communicating with your embroidery machine.

- Click the machine icon in the menu bar and check that your embroidery machine is listed in the menu. If it is not, check the USB connection, then choose Quit and start TruE™ 3 Machine again.

Note: If the USB connection between your embroidery machine and computer is temporarily interrupted, you may need to restart TruE™ 3 Machine.

EC006 I have sent a design to my embroidery machine, but nothing is happening.

You can only send a design directly to your embroidery machine if the following folder exists:

/[Home]/TruEmbroidery/TempSend.

If this folder does not exist, do as follows:

1. Open a Finder window.
2. Choose **Go > Home**.
3. Click the **TruEmbroidery** folder to open it.
4. **Control-click** an empty area of the screen and choose **New Folder** from the context menu.
5. Name the new folder **TempSend**.
6. Send the design again.

Now try to send the design again.

EC008 I exported my embroidery to my USB stick, but I cannot browse to it on my embroidery machine.

Your embroidery machine may not be able to read USB sticks with a large capacity. Check the manual for your embroidery machine for information on limitations on the size of USB stick memory.

EC009 I exported my embroidery to my USB stick, but I cannot find it when I browse the stick on my embroidery machine.

You may need to place the embroidery within a particular folder on your USB stick. For example, on the Janome MC350E the embroidery files must be placed in the EMB5 folder, while for the MC11000 and MC12000 they must be placed in the Embf folder.

GE001 I cannot open Melco (.exp) files into the TruEmbroidery 3 software.

The Melco format (.exp) extension is also used by default in the Mac operating system.

Therefore, you would not be able to open those files via the Open dialog.

In order to use Melco files; use Insert/View to use those designs in your TruEmbroidery 3 software.

GE002 Some of the items in a menu are dimmed.

Certain items (for example Undo in the Edit menu) are only available once an embroidery design is shown on the screen.

GE005 I can't see the toolbar or some of the icons.

Use Reset All Apps in TruE™ 3 Configure to return the toolbar and windows in the app to their default settings.

To return the icons in the toolbar to their default settings, choose View > Customize Toolbar, and drag the default icon set into the toolbar.

To use Reset All Apps:

1. Ensure your designs are saved in any TruEmbroidery™ 3 Software apps that are open.
2. Click the TruE™ 3 Configure icon in the Launchpad, or double-click the TruE™ 3 Configure icon in the Finder.
3. Click the Utilities tab.
4. Click Reset All Apps.
5. Click the Quit Open TruE 3 Apps button to close all open apps.
6. Click the Reset All Apps button.

Note: If some TruE 3 apps are still open, a message will appear, saying that some apps appear to be running. Click OK to close all running TruE 3 apps, or click Cancel.

The toolbar and windows in your app will have been restored to their original state.

Note: If preferred, to check the toolbar choose View, then choose Show Toolbar if the toolbar has been hidden, or choose Customize Toolbar to reset the toolbar if icons have been added to or removed

GE007 When I try to use the numbers box to select a thread number, the wrong thread shade is selected.

The find thread feature in Color Selection allows you to enter partial thread numbers. The first thread in the list matching the number is found, with priority given to an exact match. The existing thread number is also listed. If you are attempting to find a thread with only part of the number, the first thread matched may not be the desired thread. To ensure you select the correct thread, enter the thread number as it appears in the list. Some thread ranges have prefix characters on the thread number. These must also be entered to obtain an exact match.

GE008 A thread in an embroidery from a friend had a different name or number when I first opened it.

The thread name or number is changed when the thread is opened if the Thread Range of the selected color is not found in your thread database. This could happen if the design you are attempting to edit was supplied by someone with a later version of the thread database. The color will be replaced with the nearest match in the Import Thread Range you have set in TruE™ 3 Configure. You can alter it to any other color if desired. To check for the latest updates for the TruEmbroidery™ 3 Software, use Smart Update in TruE™ 3 Configure.

GE010 No dongle attached. Cannot open or use application (7).

This message will appear when trying to start an app if the TruEmbroidery™ 3 Software cannot detect the dongle (data protection device). Ensure the dongle is plugged into a free USB port of your computer

GE011 No dongle attached. Cannot open or use application (33).

This message may appear if you try to use TruE™ 3 Create shortly after starting or logging into your computer, before the system is fully ready. Wait for a few seconds and try again.

GE026 Not enough memory available to perform function.

This message will appear when system resources are low. Close other apps and try again. If this does not work, try restarting your computer.

GE031 Not enough memory available to perform function.

This message may appear if the embroidery you are attempting to load is corrupt. For example, it might have the extension .vp3, yet not be a proper Husqvarna Viking/Pfaff embroidery.

GE039 Information About Colors in TruEmbroidery™ 3 Software Files

The TruEmbroidery™ 3 Software will display threads in a file in the same way on any computer where it is installed. That is, the colors used will be the same even if they are reproduced slightly differently on different monitors. You can print a worksheet to see the colors and color names used in a particular design. This is true, even if you do not have all the threads in a design defined in the database on your computer. This is because a TruEmbroidery™ 3 Software design has complete information for each of the threads it uses.

Each thread used in a design will fall into one of the following categories:

- A thread from the Thread Database.
- A thread from the Thread Database that is not on your own Thread Database because your database is out of date.
- A custom thread defined in the file that does not appear in your Threads database.

The availability of threads in the Thread Database will only affect parts of the TruEmbroidery™ 3 Software where you can change colors, as follows:

- Editing apps: TruE™ 3 Studio and TruE™ 3 Modify
- Design apps: TruE™ 3 Create
- Adding/Editing Thread: TruE™ 3 Thread Cache
- Generating fonts: TruE™ 3 QuickFont

Below are some situations you may encounter according to the availability of thread definitions, as categorized above.

GE040 I have a design from another user that uses threads from the Thread Database that I do not have.

Use Smart Update to find and download the latest thread database, which you can then install.

GE047 How do I change the measurement in the TruE 3 software?

The measurements are taken from the settings on the Appearance tab in the **TruE 3 Configure**.

To change those settings, do the following:

1. Go to the **Launchpad**.
2. Open **TruE 3 Configure**.
3. Click on the **Appearance** tab.
4. From the **Show Measurements In:** section, either choose **Millimeters (mm)** or **Inches (")**.

GE049 I cannot see all my TruE 3 icons in Launchpad.

Launchpad shows the icons for all your installed software on your **Mac®** computer.

Depending on how many apps you have installed on your **Mac®**; the icons may span more than one page in **Launchpad** .

When there is more than one page of icons available in **Launchpad** , there will be a number of 'dots' – representing all the available **Launchpad** pages. The dot for the current page will be highlighted, click on one of the other dots to navigate between pages.

HD001 How do I find the latest dongle drivers?

The latest dongle drivers (v7.40) can be found by opening **TruE3 Configure** and then clicking on the **Smart Update** button.

The dongle drivers allow compatibility with the latest Mac® OS X El Capitan operating system.

IN021 Where are my samples/backgrounds/documents/bonus designs?

When installing any of the TruEmbroidery™ 3 Software samples/backgrounds/documents/bonus designs the files should be installed in subfolders of the folder */Users/Home/TruEmbroidery3/* (where *Home* means the account of the user you are logged in as), however occasionally this may not be the case. This will result in your samples/backgrounds/documents/bonus designs being installed into the root of your hard disk, for example Macintosh HD.

If this occurs, you may either load the samples from their current location, or move/copy the folder(s) to the correct location.

Please note that by default the Mac® will replace the content inside the folder, therefore it is recommended to make a copy of your files before replacing.

IN024 "This package is incompatible with this version of macOS."

You may receive this error message when trying to install the older dongle drivers for TruE3 onto macOS Catalina.

If you receive this message, you should download and install the latest [TruE3 Dongle Drivers](#)

RE001 How do I change my personal information for my software registration?

Simply click the Register button in TruE™ 3 Configure and repeat the registration process. This does not change the registration status of software you have already registered, but it does allow you to change your personal information and/or dealer information.

Ensure your dongle is connected to your computer before you start, so that your current registration details can be easily retrieved.

If your dongle is not connected, you will need to enter your e-mail address and password to find your registration details.

TC127 Clicking on the Register, Activate Dongle or Smart Update buttons have no effect

This may occur on an existing installation of the TruE 3 Embroidery System as a result of upgrading to the latest **Mac OS Update**

To resolve this issue; do the following steps:

1. Go to <http://www.truembroidery.com>
2. Click on the **Downloads** link at the top of the page.
3. Click on the **True 3 Download Portal** button.
4. Enter your registered **E-mail Address**.
5. Enter your **Password**. Click **Next**.
6. Click **Next** again.

7. In the **TruEmbroidery 3 Software** section, download the latest **TruEmbroidery3Software32.pkg** file.
8. Close down all TruEmbroidery 3 System Apps.
9. Install the **TruEmbroidery3Software32.pkg** file that you just downloaded.
10. Open **TruE 3 Configure** and confirm that clicking on the **Register**, **Activate Dongle** and **Smart Update** buttons now open up a window in the background.

TC129 Delete My Fill: Are you sure you want to delete the selected pattern? This action cannot be undone.

This message appears when you delete a My Fill pattern from the Manage My Fills dialog. Click Yes or No, as desired.
